

Beam Tech Electronics Co., Ltd.

*Compact uninterruptible power supplies (UPSs)
and sine wave UPSs*

With more than 40 years of experience in the electronics industry, the ISO 9001-certified Beam Tech Electronics Co., Ltd. is a major developer and maker of sine wave line interactive uninterruptible power supplies (UPSs) with capacities up to 12KVA.

Beam Tech offers a comprehensive range of UPS products including, the compact models SI 400 and SI 425, as well as a complete range of pure sine wave line interactive UPSs from 650VA through 12KVA, including standard- and long-run models in rack and tower cabinets. In addition, the firm's pure sine wave inverters for telecoms and home applications are highly popular in the international market.

The SI series is the only UPS currently available that can be mounted into a PC case using a 5 1/4-inch drive bay—a fully integrated UPS with all the necessary components of a traditional UPS in a single box, providing convenient, space-saving, hassle-free, and power-protection solutions for mission-critical computing environments.

Beam Tech claims that all of its products have won international product certifications from such institutions as BSMI, TUV, CE, UL, and cUL. The products are widely welcomed by customers all over the world, especially in Europe, Japan, Southeast Asia, Africa, and Latin America, and about 90% of the company's output is exported.

The firm stresses that in addition to finished products produced on an OEM/ODM basis, it also specializes in delivering semi-knock-down (SKD) units and never falters in its effort to develop newer and better products for its customers worldwide.
