

Fu Yu Shan

Machinery Works & Co., Ltd.

Plastic extrusion machines, plastic injection molding machines, plastic waste recycling and pelletizing machines

Since its founding in 1976, Fu Yu Shan Machinery Work & Co., Ltd. has been at the forefront of designing and manufacturing plastic waste recycling and pelletizing machines, along with advanced extrusion equipment. Driven by a spirit of innovation and professionalism, the company has evolved into a leader in the plastic machinery industry, continually expanding its global footprint with high-performance, high-quality solutions.

Fu Yu Shan specializes in the research, development, and production of plastic waste recycling and pelletizing machines. Its key product offerings include:

- One-Stage, Two-Stage, and Three-Stage Extrusion Granulators
- Injection Molding Machines
- Peripheral Equipment: Extruders, Extruding Injection Shoe Last Making Machines, and Shredders

To ensure optimal performance, the company provides customized screw designs tailored to various waste materials—such as P.P., P.E., and A.B.S.—and different material forms, including dry powder, wet powder, film, flakes, and corner trims. This customer-centric approach guarantees superior mixing effects and product quality.

In 1984, Fu Yu Shan achieved a groundbreaking milestone by integrating extrusion and injection technologies, leading to the development of Taiwan's first Extruding Injection Shoe Last Making Machine. This innovation allows for the mold injection of a pair of shoe lasts weighing 0.5–6 kilograms at a time, producing high-quality plastic shoe lasts with a specially designed screw mechanism that achieves an impressive 95% bubble-free rate. The product has been widely praised in the market for its precision and efficiency.

Fu Yu Shan distinguishes itself with its in-house development of gearboxes and screws, avoiding off-the-shelf components to ensure superior durability and performance. The brand has earned industry-wide recognition for its commitment to quality, providing customers with stable, reliable, and long-lasting machinery solutions. With a strong focus on technological innovation and global expansion, Fu Yu Shan continues to refine its expertise in waste recycling and plastic injection technologies. The company remains dedicated to building a sustainable future, delivering greater value to customers, and positioning itself as a world-class brand in plastic machinery manufacturing.
