# *Kuang Shin Enterprise Co., Ltd.*

## Patented ET-100BK adjustable worktables

**K**uang Shin Enterprise Co., Ltd. has been in the office furniture industry for over 25 years, mainly making kids' furniture, OA chairs, and computer desks, also now promoting the ET-100 BK series worktables which was debuted in late 2014.

The tables, measuring 120cm (W) x 88cm (D) x 120cm (H) and weighing 50 kilograms, come with a two-piece particle-board tabletop that may be tilted 25 degrees from the horizontal and two aluminum telescopic legs that is adjustable to maximum height of 120cm and minimum of 73cm, a feature making the table ergonomic, even for workers who believe standing up while working to be better for health.

The tabletop's tilt is adjusted by a manually operated brake mechanism while the legs are controlled by a threaded-rod driven by an efficient motor, eliminating the concern of gas or fluid leakage which can happens to typically used gas springs.

The front edge of the tabletop has an aluminum channel for holding stationery like pens and erasers. The rear top, fixed horizontally, carries computer monitors or books, with both tabletops being nonflammable and scratch resistant.

The two legs, each of which built in an RoHS-compliant iron bar to strengthen vertical stability, are extruded to ensure excellent fitting between the inner and outer parts.

The legs can raise maximum weight of 100 kilograms at 24 millimeters per second, with a built-in circuit to shut off power to protect the CE-certified motor (powered by 110/230V AC wall socket) upon detection of overweight, backed by clamping force of 100 kilograms to prevent slippage due to power outage.

The ET-100 BK is a patented, knockdown table with parts mostly made in Taiwan and a one-year warranty.

# Jason Auto-Machinery Co., Ltd.

Combination jointers and planers, slider-rail assembly machines, brake cable & steel rope welding machines

Jason Auto-Machinery Co., Ltd. was founded in 1987 by its owner Mr. Jason, who was originally inspired to pursue a career in machining while in an internship course during his school years, where he was awestruck by a cutter on a lathe that shaped a rotating iron bar into a fluted workpiece or ball-tipped cylinder. Such deeply-etched impression sparked his curiosity ever since to, also due to industrial evolution in Taiwan, customer support and guidance by predecessors, motivate the entrepreneur to grow sustainably his dedicated automated machinery business over 20 years.

Just as seed capital is essential to any startup, Jason Auto-Machinery will forever be grateful to Changhua-based (southern Taiwan) Chia Cherne Industry Co. among other customers for placing the first order to start the fledgling enterprise on the way to its current success.

## Business Philosophy

While having gained strength and know-how through developing and manufacturing countless automated machines, the company continues to adhere to the four core pillars of its business philosophy.

1. The mission is to always supply excellent, optimized machinery.
2. The goal of partnership is to provide consultancy and high-end service.
3. Jason's highest honor is achieving total customer satisfaction.
4. The maker values dealing with global customers as fateful opportunity to build mutually-profitable ventures.

Jason Auto-Machinery's product lineup mainly includes automatic two-sectional slide assembly machine, automatic tri-sectional ball-bearing track assembly machines, two-in-one brake cable/steel rope welding machines, etc.

Features of Jason Auto-Machinery's automatic tri-sectional ball-bearing track assembly machine (Model 46):

1. Number of steel balls used is easily adjustable.
2. Slides can be automatically lubricated with grease during assembly.
3. Machines can be custom designed, carry customer's logo, and developed/made according to sample and special specs.

# Chueng Shine Co., Ltd.

## Office chairs and desks

---

Founded in 1981, Chueng Shine Co., Ltd. has grown into a leading Taiwanese maker of OA furniture with a catalog that encompasses a wide range of seating and desk products. Today the company concentrates on the development of innovative and highly functional products for the global market.

Chueng Shine started out as a processor of hardware products and later on transformed itself into an OA chair maker. In the quest for market niche in the world arena, the company has worked constantly to enhance its manufacturing technology and roll out quality-guaranteed products.

The company's integrated factory in southern Taiwan turns out products with a local-content rate of more than 70%. It handles all critical manufacturing processes in-house, including iron and steel shearing, forming, and processing.

To comply with environmental requirements, the company subcontracts highly polluting processes such as electroplating and paint-spraying to supporting factories that have their own pollution-control facilities. "All of the products we make are recyclable and can be reused in compliance with the environmental-protection regulations adopted by the industrially advanced nations," stresses a senior Chueng Shine official.

The company boasts ISO-9002 and ISO-9001:2000 certification, thanks to its constant efforts to upgrade processes for manufacturing high-quality products. In line with its focus on high quality, the company has invested in sophisticated equipment and automated production machinery. All of its products are carefully manufactured and inspected by skilled and experienced workers.

Chueng Shine has won numerous patents in Japan, the U.S., and Europe. Most of its products are made to its own design, with only a minor proportion being turned out on an OEM basis. The company is committed to offering the best of services to its clients, and welcomes any orders and inquires.

# Tung Yu O.A. Co., Ltd.

## Office chair components

**T**ung Yu O.A. Co., Ltd., founded in 1986, is a leading manufacturer of office chair components in Taiwan, being known for products boasting multi-functionality.

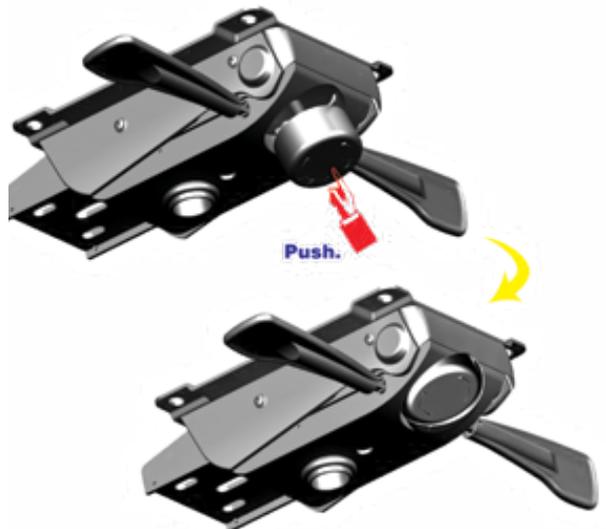

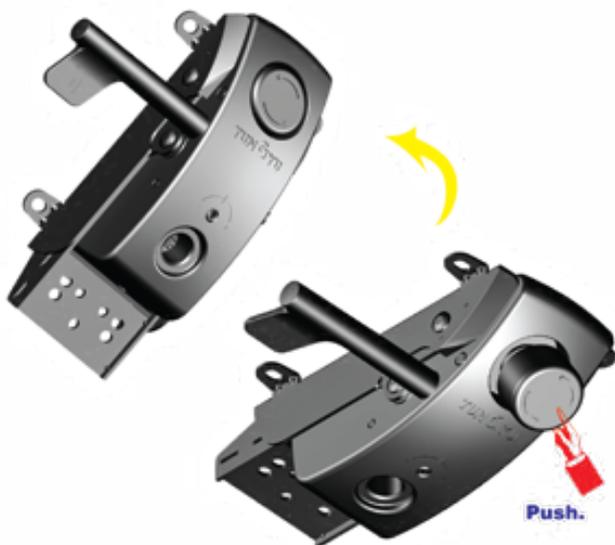

The company's products, including synchronizing mechanism, self-weighting mechanism, tilt mechanism, seat slider, and back bar, feature ergonomic and safety-oriented designs.

Its SN89 synchronizing mechanism, for instance, allows the backrest to move at about a 2:1 ratio relative to the seat with its four locking positions, coupled with a return-prevention system for the backrest. Also, it is integrated with tilting function and seat slider, which enables adjustment of the depth of seat.

Its SA-9001 self-weighting mechanism, strengthened by an aluminum housing, enables a user's weight to automatically adjust to a comfortable sitting position and with recline tension without the need for manual tension adjustment. The mechanism comes with two levers, with one for height adjustment and the other for tilt adjustment. Also, it is outfitted with a four-position locking design and return-prevention system for the backrest.

### SN-8960 Product Introduction

Front chassis, ergonomic design, double rod pressure and tilt angle lock switch, hand-adjusting spring, may vary depending on the individual's body weight and comfort make the appropriate adjustments, breaking the previous adjust the springs forward tightness.

Besides supplying such parts that are well suited for medium and large chairs, the company always welcomes partnerships with contract manufacturers, dealers, traders and retailers for R&D and production projects.

Tung Yu has built solid technical strength, upheld by precision manufacturing equipment, stringent quality inspection, scientific management, and well trained R&D specialists.

In addition to making thorough inspection of every single product before delivery, the maker places strong emphasis on research and development, quality, service and innovation, all of which help to develop products that are in tune with customers' tailored requirements.

With providing customers optimal products and services the corporate goal, the company has never stopped upgrading its manufacturing capability by introducing new designs and manufacturing facilities. (KL)

# Chiao Sen Wooden Industry Co., Ltd.

## »»» Wooden furniture manufacturing and piano or mirror-finishing

Chiao Sen Wooden Industry Co., Ltd. has been engaged in the woodworking industry for over 30 years, specializing in wooden-furnishing manufacturing including mirror or piano finish on contract basis.

Its product lineup includes storage boxes, boxes, lamp trays, lamp holders, photo and picture frames, digital photo frames, as well as wooden/bamboo and rattan parts and fittings; while it is experienced in processing woods and minerals as rocks.

Besides able to offer mutually-profitable solutions, the maker also provides powder coating that features resistance to scratch, abrasion and moisture, with the processing being eco-friendly, emitting zero pollution and consuming low energy.

Another advantage of powder coating is its low-noise pollution because it eliminates the need for polishing; while powder overspray can be recycled, and the coating can be finished in one step to minimize production cost and enhance quality.

In addition, the process uses nontoxic and odorless solvents to leave finished products without reeking smell to render products more user-friendly and with selling point; while the coating is vibrant, durable, washable, health-enhancing, and augments life quality.

The medium-density fiberboards (MDFs) coated with company's latest technology are applicable to waterproof

sanitary cupboards; desktop and laminate for display shelf that require durability and scratch resistance; houseware whose use involve physical contact with people; children furniture conforming to non-toxic requirement; and bentwood desks and chairs whose coating and sanding otherwise consume much time and labor.

The company has passed SGS verification on its processing quality.

# King Ming Industry Co., Ltd.

## Dinning carts, shelving units and systems, and oven racks

Founded in 1975, King Ming Industry Co., Ltd. specializes in the manufacture of dining carts, hospital/clean room equipment, medical baskets and oven racks, and shelving units and systems for industrial, commercial, and residential use, as well as for use in warehouses, hospitals, schools and dining and beverage equipment. Besides, the company also provides customized products.

The company operates a 72,000-square-foot plant, located in Yunlin County, central Taiwan, which boasts convenient transportation and can be expanded to accommodate new products. Backed by decades-long experience in wire forming and tubing, the company is capable of independently handling the entire production process from wire drawing, cutting, and bending to welding, plating, varnishing, and packaging.

In recent years the company has introduced from abroad a spate of high-tech automated foreign machines that can shorten manufacturing time, save labor cost and turn out higher-precision products to meet customers' demand for higher-quality products.

This well-integrated production capability ensures consistent quality and has earned the company a solid reputation as one of the best suppliers in its line.

King Ming is also impressive for its innovativeness. Some of its products, widely used in supermarkets, department stores, warehouses, hospital kitchens, living rooms, etc., have been patented in the U.S., Japan, and other countries for their innovative design. The company is also certified by NSF in the U.S., providing further evidence of its status as a world-caliber manufacturer.

# M.S. Printing Co., Ltd.

Wood-grained decorative paper, melamine paper, PVC/PETG films

M.S. Printing Co., Ltd. has been dedicated to the wood-grain printing industry for more than 40 years. The company offers wood-grain and plain color printing on paper, PVC, PVC transfer films, melamine paper, PETG and other environmental friendly materials for different applications as surface lamination, membrane press, profile wrapping, high pressure lamination, flooring tile and edge banding, with an array of wood grain patterns available.

The company's PVC/PETG films are hot-sellers, which are semi-rigid and can be optionally embossed, with standard thickness ranging from 0.08mm to 0.43mm. With improved coating and membrane press, these films can be laminated on curved surfaces and are easy to clean with water, hence being ideal for furniture decorating, interior decoration, self-adhesive films and moulding.

The company is also noted for offering different coatings on paper, such as Amino, N.C., PU and melamine. The coated paper can be laminated to a variety of materials without the need for further finishing, whereas N.C. coating can be additionally coated or printed.

Dedicated to improving product quality by upgrading its facilities such as printing machinery and engraving cylinders, the company is known as a trustworthy supplier.

# Tay Arng Co., Ltd.

## OA chairs, hardware and components

Tay Arng Co., Ltd., located in Tainan of southern Taiwan and engaged in office chair making for more than 20 years, specializes in manufacturing office chair mechanisms, hardware and parts as chair back panels, spring cups, screws, suspension seat bases, pneumatic seat bases, pneumatic plate supports, armrest metal sheets, swivel plates, chair arms, chair tube connectors, armrests, seat brackets, iron plates for OA chairs, adjustable back supporters, and so on.

In the past decade, the company has exported around 95 percent of its annual output, mostly to North and Latin Americas, with its products all undergoing strict quality control throughout production, including impact and bending tests by SGS.

Besides the company also invests in developing on its own various useful gauges to effectively help workers keep deviations to minimum during each production process.

To ensure high quality, the company also emphasizes improving structural design and material application, mainly based on its knowledge of metalworking and molding. Such design improvement has paid off for SGS's test report shows Tay Arng's adjustable back supports, for instance, are structurally strong enough to be bent over 20,000 times.

Tay Arng's dedication to quality also shows in its consistent use of high-grade materials in production, despite relatively higher cost. For example, its chair backs are mostly made of reinforced synthetic mesh with 650 holes, compared to typical models with 450-500 holes, which achieve smoother surface for higher comfort and longer lifespan.

Tay Arng is confident of seeing robust growth in 2015, mainly because its devotion to quality has gradually brought back old customers over the past few years while also attracting ever more new clients across America.

# Hanaco Group

Wooden furniture, living room furniture, office furniture, desks, storage cabinets, bathroom furniture, dining furniture, grid shelves, special crafts for home decorations

Founded in 2006, Hanaco Group is a world-caliber manufacturer and marketer of furniture, with a production base in China and a branch in Taiwan. Despite its tender age of only eight years, Hanaco claims it is one of the few furniture makers that have integrated production capability, from material handling to furniture manufacturing, along with rich cross-strait sales experience. It is fully able, the company says, to serve clients with ample capacity, high production efficiency, consistent quality, and timely after-sale services. The group has a capitalization of US\$10 million and

employs more than 800 workers at its China manufacturing base, which occupies an area of some 90,000 square meters and is able to turn out enough furniture to fill 200 forty-foot containers a month. Around 80% of the firm's products are currently exported to Japan, with the remainder going to Europe and the U.S. Hanaco takes particular pride in its highly integrated production, with complete lines of equipment turning for melamine processing, PVC and PU lamination, vacuum forming, sheet metalworking, powder coating, plastic injection molding, fastener and hardware manufacturing, and packaging. This unparalleled integration has helped the company establish a high profile in the industry.

A strong commitment to quality is another element in Hanaco's success. The company carries out strict quality control measures throughout the production process, and its manufacturing base has won ISO 9001 and ISO 14001

certification in an effort to assure customers of the best quality and added value. The manufacturer also pays strict attention to R&D, and is well able to develop new products in cooperation with customers.

The firm's product lineup covers living room furniture, office furniture, desks, storage cabinets, bathroom furniture, dining furniture, racks, grid shelves, special crafts for home decorations, and other quality products.

# Eam-Win Co., Ltd.

## OA chair parts

Being a major furniture-parts maker in Taiwan, Eam-Win Co., Ltd. focuses on production of OA chair-parts such as base, caster, back-part, armrest, foot ring, seat-cover, and metal mechanism, etc.

Applying compounded-material including nylon, glass-fiber, and plastics, the company operates three plants in Tainan City, southern Taiwan to handle material treatment and products injection works.

For more than 15 years, Eam-Win has fabricated OA chair parts mostly on OEM and ODM basis in large or small volume to meet clients' requirements. "We not only use advanced manufacturing machines, but also purchase testing-instruments and spectrograph for quality test & color-shade inspection, so as to guarantee the supply of products boasting superior quality and exact color. With sophisticated facilities, we can control all processes in-house from raw materials to manufacturing until packaging," says a senior manager.

To sharpen its competitive edge, Eam-Win steadily invests in R&D to turn out innovative, high-end products that have won reputation among customers. All products made meet BIFMA/ANSI-test standard and win SGS certification.

The firm exports all its output globally, mainly to the United States, Europe, the Middle East, Japan and Southeast Asia, also promising prompt delivery and the best services in addition to top-quality products.

# Hua Feng Machinery Co., Ltd.

Aluminum swivel discoid (Lazy Susan), hydraulic hinges, and cable grommets

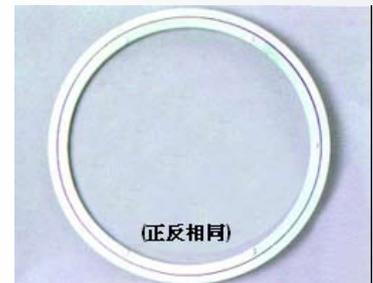

Established in 1973, Hua Feng Machinery Co., Ltd. has been a manufacturer of aluminum alloy turntables since 1982, supplying Lazy Susan for dining tables, models for worktables, paint sprayers, and many more.

After years of effort in R&D and innovation of turntables, the company expanded into hydraulic, quiet-operation hinges for cabinets in 2003, which gained multiple patents in Taiwan, Germany, and China in 2006, and have been added to its line a year later.

In 2009, the manufacturer began also engaging in cable grommets, aiming to help office furniture and interior décor businesses to add value to products and services, which has proven successful.

Committed to growing together with players in the sector, Hua Feng is willing to provide consumers, importers, exporters, and hardware manufacturers with information and consultancy regarding all its products.

Enquiries about OEM, ODM, customization services, and other details are welcome.

# *Jau Huang Industrial Co., Ltd*

## Display racks & stands, wood grain key/CPU box

Involvement in wood material powder processing for 14 years, Jau Huang Industrial Co., Ltd. has in recent years developed into a wood-grain furniture maker, focusing on production of wood-grain display racks and stands, key/CPU box.

“Our wood grain transfer printing and high-temperature powder coating are high-end technology that can perfectly replicate natural wood and mineral grain on metal products,” a senior manager says. “Our products not only faithfully present wood grain effect, but also feature strength of iron, enabling the products to last longer than wooden counterparts.”

To enhance operating efficiency and lower manufacturing cost, Jau Huang has kept investing in upgrading facilities and cultivating talents.

“The company’s products significantly replace the use of wood or stone to achieve natural beauty without wasting wood and mineral resources, not to mention its recyclable nature,” the manager emphasizes. “So, the products are eco-friendly and very popular in today’s environmentally conscious market.”

“With years of efforts in R&D, we have successfully developed a variety of grain patterns, all conforming to requirements of multiple international standards after transfer printing,” he adds.

Jau Huang’s wood-grain display racks and stands are available in different colors, including silver white, burgundy red, light pink, light blue, etc. The company welcomes OEM and ODM orders as well as special requirements from customers.

Jau Huang will attend Japan Shop 2014, scheduled for March 4-7 at Tokyo Big Sight, Tokyo Japan, to display its latest products. It welcomes buyers to visit its booth: No. JS4204 at East Hall 4. Please contact the company in English or Chinese

# Da Yin Wei Tong Co., Ltd.

## PU office chair casters, Logo casters, color wheels

**D**a Yin Wei Tong Co. (DYWT) is a professional manufacturer of casters, mainly for office chairs, that is located in central Taiwan. The company has built up an admirable reputation in the market, both at home and abroad.

With an unwavering commitment to quality, DYWT works constantly to upgrade its manufacturing technology and develop high-end PU casters, in addition to nylon ones. The company has applied new adhesive technology to its PU casters so that they will not break down in the most trying of conditions.

The firm has also applied sophisticated plastic molding technology to develop bicolor, multi-color, and unique-design casters for upscale markets. SGS certification assures the quality of most DYWT products.

Today the company's experienced 30-person work force turns out an average of around 250,000 casters a month. The casters are marketed globally, mainly in the United States, Brazil, Spain, Poland, Japan, China, and the Middle East.

DYWT sells its products under its own logo, "DYWT," or under single letters such as 'S,' 'V,' or 'Y.' Thanks to the popularity of its casters, the firm's revenues soared 50% in 2012 and the outlook for continued growth this year is bright.

To satisfy increasing market demand, the company recently built a new plant. The new factory, which is fully automated, began operating in January this year.

DYWT welcomes all orders and is confident of its ability to provide buyers with top-quality products, competitive prices, prompt delivery, and the very best of service.

# Landmega Furniture Co., Ltd.

## Office furniture, computer desks, seating items

Founded in 1991, Landmega Furniture Co., Ltd. is a leading Chinese furniture manufacturer and exporter. With a production base covering 42,000 square meters in Foshan, Guangdong Province, the company is primarily engaged in the production of office furniture and various seating products including staff chairs, executive chairs, visitor chairs, recliner chairs, bar chairs, sofas, steel folding chairs, conference tables, and computer desks, as well as all kinds of metal accessories.

Landmega employs a group of professional designers and technicians together with more than 1,000 skilled workers. It has also installed a large number of advanced manufacturing machinery and equipment such as welding robots, sponge cutting machines, laser engraving machines, and computer-controlled digital instruments.

Furthermore, Landmega has a strict quality control team that monitors every aspect of its manufacturing processes from procurement and production to delivery. To guarantee the quality of its products, in 2004 the company invested a large sum of money in a series of testing instruments that have helped it acquire such world standards as TUV, SGS, STR, and BV.

With its implementation of the ISO9001:2000 Quality Control System, Landmega adheres firmly to its corporate policy of training excellent personnel, adopting scientific management, offering first-rate services, and guaranteeing the best product quality.

The company's products have been sold to over 110 countries and regions. Some of its clients are famous supermarkets and chair stores, including JYSK, Walmart, Auchan, Carrefour, Caform, Office Depot, Officeworks, and Sodimac.

Based on its philosophy of "Quality First, Credit First, and Service First," Landmega is committed to doing its best to meet its customers' needs. Secure in the belief that high quality and innovative design are its core competitive advantages, and insisting on offering quality products at competitive prices, the company has gained increasing popularity among clients both at home and abroad.

# Chang Fu Precision Co., Ltd.

Metal furniture

Founded in 1995 in Changhua County, central Taiwan, Chang Fu Precision Co. is a dynamic furniture manufacturer that specializes in compact metal furniture including racks, shelves, cabinets, drawers, trash cans, hangers, and bathroom accessories. All of the products are offered in knockdown or ready-to-assemble form.

Chang Fu is trying to outwit its increasingly competitive rivals in China, which mostly offer lower prices, by placing more emphasis on R&D and the design of high-end products. "We operate mostly on an OEM and ODM basis," explains Joe Huang, the company's president, "but we also engage in R&D for the development of self-designed products."

Chang Fu's plant in Changhua handles almost all manufacturing processes except painting, which is contracted out. "Most of our products are made of metal, mainly stainless steel," Huang notes. "However, some metallic products need special finishing, so we outsource that work to specialized surface-coating contractors."

The company adopted the Quality Management System in 2007 and became ISO 9001 certified in 2008. As its contribution to the global environmental protection movement, Chang Fu tries to use recyclable and non-toxic materials in its production operations; it adopts recycled paper for packaging, for instance, and most of the metal it uses is recyclable.

The company's constant dedication to enhancing the quality of its products has helped upgrade its position in the international market. Most of its products have been patented in the U.K., Germany, and Taiwan, and most are sold to Europe and Japan.

# Green May Industrial Mfg. Co., Ltd.

## Electric beds, massage beds & home nursing beds

As a dynamic furniture manufacturer, Green May Industrial Mfg. Co., Ltd. specializes in designing and manufacturing home nursing beds, household beds, electrically-adjustable beds, and massage beds.

Based on its expertise in transmission mechanism, the company has successfully developed electric beds for more than eight years, which are popular with its clients, mainly hospitals and nursing homes.

To meet various needs of its clients, Green May has kept working hard on R&D to develop multi-function high-end beds. Among its popular products are home nursing beds, household single and double beds, dual-motor or tri-motor electric standard beds, Japanese-style household beds, and European-style household beds.

Most of the company's beds are made of stainless steel and MDF boards, which are purchased from prestigious local suppliers. The company has always committed itself to supplying top-quality products to its clients.

The company has recently developed a series of adjustable beds that can be lifted in the head section up to 85 degrees and foot section to 30 degrees in line with quality mattresses made of silicone rubber or latex, depending on the need of customers. Besides, the beds can be dismantled for easy package and transportation.

For hospital or nursing home use, the said beds can be installed with rails on both sides to protect the weak or the disabled. Moreover, such beds also have stretchy trays on which the weak or the disabled can dine.

Recently Green May has rolled out a series of high-end mattresses installed with specially-designed mechanism that can match different kinds of electric beds and can be adjusted upwardly and downwardly along with the beds.

The company welcomes any orders and promises prompt delivery plus best after-sales services. (JL)

# Green May Industrial Mfg. Co., Ltd.

## Electric beds, massage beds, home nursing beds

The Green May Industrial Mfg. Co., Ltd. is a dynamic bed manufacturer with a variety of products in three categories:

- General home beds, electric beds, massage beds, futons, and European-style leisure beds;
- Medical beds and home nursing beds; and
- Customer-order specially designed beds.

Green May's electric beds, which were developed more than eight years ago, have proven highly popular with customers, mainly hospitals and nursing homes.

To meet the growing demand for high-quality beds, the company emphasizes the development of high-end innovative and functional beds made mostly of stainless steel and MDF board procured from reputable local suppliers.

Green May recently developed a series of adjustable beds with a head section that can be elevated up to 85 degrees and foot section that can be raised 30%.

The mattresses are made of silicone rubber or latex, depending on customer needs, and the beds can be dismantled for easy packaging and transport.

In addition, rails can be installed on the sides of the beds to protect the weak or disabled in home or hospital use. The beds also have trays on which the bedridden can dine.

Green May promises quick delivery of its products, which are sold all over the world.

# Matthew Comfort Co., Ltd.

Wire display racks, sheet-metal CD racks, magazine racks

The Matthew Comfort Co., which was established in 1987 in Changhua County, central Taiwan, focuses primarily on manufacturing metal furniture products such as wire display racks, sheet-metal CD racks, magazine racks, garbage bins, and the like. The company is accredited with ISO9001:2000 certification as well as the U.S. NSF certification.

Under the leadership of president Yang Hsin-cheng, the company has diversified the materials used in its products to encompass aluminum alloy, stainless steel, and plastics, and has expanded its product line to include adjustable tables, display systems, wavy wire racks, household kitchen carts, stainless-steel medical handcarts, and food display handcarts, to name just a small selection.

Together with a discerning choice for high-quality materials, the company's engineering team combines stringent quality control with painstaking care to safeguard the entire development and production process from R&D, tooling production, CNC pressing, spot welding, carbon dioxide welding, and surface power coating to quality inspection, assembly, packing, and shipping.

Guided by its president's pursuit of constant quality refinement, Matthew Comfort is renowned for its metal-furniture R&D capability. Its research department continues to carry out new product design and development, production process improvement, and respect for intellectual property through several proprietary patent listings from Japan, Germany, the U.S., the United Kingdom, and France.

The company reports that it has expanded its export markets to over 20 countries, mainly Japan, the U.S., and the European Union. It currently operates an 82,800-square-foot plant, where it is planning to streamline its output in sync with such industrialized areas as the U.S., Europe, and Japan.

# Guangdong Sunteam Steel and Wooden Products Co., Ltd.

## Office furniture

**G**uangdong Sunteam Steel and Wooden Products Co. is a well-known SGS-approved Chinese maker of office furniture with a 60,000-square-meter factory in Shunde, Guangdong Province.

The factory is equipped with advanced equipment including welding machines, punchers, pressing machines, packaging machines, and other automated machinery. The facilities have been augmented recently with a sophisticated computer-controlled vacuum blowing machine, heavy-duty automatic sealing machine, and automatic presser imported from Italy.

Guangdong Sunteam currently has a work force of more than 800 people who turn out a variety of office furniture including computer desks, laptop PC desks, and file cabinets as well as TV stands and children's beds. Monthly output includes more than 80,000 units of office furniture, partly carrying the firm's own "Sunteam" brand and partly shipped on an OEM basis.

To keep abreast of global eco-trends and comply with the government's environmental regulations, the company manufactures eco-friendly furniture that is non-toxic and recyclable. It is now a major supplier of computer desks for the Lenovo Group, China's No. 1 computer maker; in addition to serving the domestic market, it also exports to Europe, the U.S., Japan, Korea, and Southeast Asia.

Constant efforts to upgrade product quality, along with prompt delivery, considerate services, and competitive prices, have won Guangdong Sunteam a good reputation among its buyers.

# Royce Enterprise Co., Ltd.

Furniture design and  
manufacture

**F**ounded in 1974, Royce Enterprise Co., Ltd. makes knockdown (KD) furniture of particle board and MDF, offering a wide range of home and office furniture to global customers.

After nearly four decades in the business, Royce is regarded as a globally leading maker of panel furniture. While operating an ISO 9001: 2008 certified plant in Batam, Indonesia, Royce currently has a total of 10 buildings, covering a total land area of 64,000 square meters, for production, warehousing and office operations, with over 700 skilled employees. The factory is also equipped with 16 plastic injection machines to produce the key fixture in-house. In order to keep upgrading service and product quality, Royce is constantly improving and adding new facilities to the production process, including wood working, plastic injection, and moldings, to streamline manufacturing processes and enhance the development of various commercial products for market demand. Currently, the company boosts its monthly production capacity up to 350 containers for one shift.

Backed by abundant resources in Indonesia and convenient wood supply from neighboring Southeast Asia, the company's production base in Batam is able to offer cost-effective furniture items to global markets, with added advantage of being close to Singapore, the world's busiest transshipment port.

To catch up with the world's eco-friendly trend, Royce also concentrates on sustainability of the environment and complies with the international forest regulations in the application of wood materials.

# Anhow Co., Ltd.

▶▶▶▶ Mousetraps, chairs, ABS tables, wardrobe stands, motorized hospital beds, love dolls

**F**ounded in 1989 by H.Y. Ke, Anhow Co., Ltd. originally made system and metallic tubular furnishings as beds, sofa beds, sofas, PC desks, shelves, and TV stands, but has diversified into mousetraps, flytraps, and chairs since 2004.

In 1993 the company set up its own AH brand, whose furnishings were sold to Japan to set a branding milestone for Taiwan-made furnishings. In 2001 it moved production to China, downsized business in Taiwan to focus on upscale products, and began exporting to the U.S. and Europe.

Anhow has developed motorized hospital beds, foldable ABS tables, Barcelona-branded chairs and wardrobe stands with collapsible structure that are hot items in Taiwan, Japan, and South Korea. Its innovative mousetrap featuring unique design and superb functionality won bronze at the 2005 Nuremberg International Invention Exhibition in Germany, also sought-after by major importers from the U.K.

The company has also been for over 15 years making lifelike love dolls under the Fashion brand, now the biggest website among Chinese competitors, and has recently become sole Asian distributor for its Japanese partner. Backed by strong R&D team and specialized factories, Anhow supplies high-end, handmade dolls in diversified styles, sizes in silicone, silicone rubber, rubber and super-soft yarn.

Also offering repairs with Japanese know-how, Anhow delivers dolls with one-year warranty on both standard and custom-made products. It is especially proud of the new, innovative modular series that enables changing of doll heads and bodies for parts from other brands, at extra cost.

# Oris Enterprise Co., Ltd.

## *Furniture design and manufacture*

**E**stablished in 1992, Oris Enterprise Co. is a furniture manufacturer with a fully equipped 400-square-meter factory in Central Taiwan and a solid reputation based on stable quality and decades of experience.

The company employs advanced equipment which enables it to meet all kinds of customer requirements. Unlike some other manufactures, Oris Enterprise accepts small-volume orders and offers excellent ODM (original design manufacturing) and OEM (original equipment manufacturing) capability. It also welcomes the co-development of innovative products together with customers.

Oris turns out furniture materials such as honeycomb boards, hollow plates, and particle boards, and also supplies customers with small- and medium-sized products such as desks, L-shaped computer desks, book shelves, cubical bookcases with casters, TV cabinets, and knockdown furniture.

Their knockdown function, light weight, and substantial structure make Oris products popular with customers all over the world. In addition to exports, the company also keeps up its business in the Taiwan market.

One of Oris's popular products, a molding desk that features good quality and competitive pricing, is exported mainly to Japan. School desks and chairs target markets in the Middle East, and student's desks and cubical bookcases with casters are promoted in Central Africa, England, Denmark, France, and Belorussia.

To save on costs and remain competitive relative to other manufacturers, Oris carries out most of its production in-house, avoiding unnecessary outsourcing costs and maintaining excellent quality while providing customers with reliable and comprehensive services at all times.
