

The background is a vibrant blue with various medical and scientific icons. At the top, there's a caduceus (a staff with two snakes) and a syringe. In the center, a large white cross is overlaid on a human anatomical diagram showing muscles and bones. To the right, a large syringe is depicted. At the bottom, a wheelchair is visible. On the left, there's a glass of water with a cube of ice. The overall theme is medical and healthcare.

HG Technology Co., Ltd.

Solid carbide cutting tools, cutting tools, ball nose end mills, carbide end mills, carbide drills, carbide reamers, dental end mill

HG Technology Co., Ltd. is a Taiwanese designer and maker of cutting tools for various machines, with professional experiences in manufacturing

Superior manufacturing technologies possessed are the biggest competitive advantage of the manufacturer, which, it claims, is the payoff of its insistent dedication to producing cutting tools in line with standards and procedures established by original European manufacturers of machinery.

The company only uses high-grade carbide rods imported from Germany, as well as advanced CNC 6-axis grinding machines from Germany and Switzerland in production. Furthermore, this maker also takes advantage of state-of-the-art coating technologies learnt from Switzerland, and employs precision quality inspection instruments, such as digital measuring projectors bought from Germany, at its factory, in an effort to make sure that its customers can increase work efficiency and minimize production costs with its high-quality, durable cutting tools.

The company's product category covers a wide spectrum of cutting tools, including carbide end mills, carbide drills, carbide reamers, carbide thread end mills, carbide chamfering end mills and exchangeable mill head series.

Committed to customer satisfactions, reasonable prices and timely services, the company has successfully exported its products to over 30 different countries of the world, with some marketed under its own brand HGT, whose cutting tools have been well received in industries of 3C products, semiconductors, medical care instruments, aerospace crafts and precision molding.

Aero Pro Co., Ltd.

Disposable surgical masks, dust respirators, non-woven filtration products.

ISO 13485 and ISO 9001
GMP certified!

Founded in 1993, Aero Pro Co., Ltd. has been dedicated to manufacturing surgical face masks, air filters and related medical equipment, having built a profile among peers in Taiwan for commitment to quality.

To offer customers unbeatable quality, Aero Pro strictly carries out by-the-book quality control to turn out products that meet international standards, including ISO13485 and ISO9001: 2008. Besides, the company has also obtained the AS/NZS 1716 approval to further strengthen its image as a quality-driven manufacturer.

Knowing that good quality hinges on production capability, the company has consistently upgraded manufacturing skills and equipment, including advanced filtration testing equipment TSI, to make sure that all its mask respirator products meet customers' stringent requirements and medical standards. Such insistence sets the company apart from rivals in the increasingly competitive global market.

The company's product lineup comprises N95 masks and surgical masks, CE/EN149:2001 FFP1, FFP2 and FFP3 dust respirators, GMP-certified face masks, non-woven air filtration media, and related medical equipment as surgical gowns, caps and so forth. In addition to medical use, the company's filtration products that are made of melt-blown compound fabrics for pleated, bag and exhaust filters can be also applied in vacuum cleaners, automotive cabins, houses, and paint booths.

Underpinned by its business philosophy focusing on safety, exceptional quality and industry-leading technologies, this company markets products worldwide, mostly under its Aero Pro brand.

Special Protectors Co., Ltd.

Healthcare and rehabilitation equipment

Special Protectors Co., Ltd. started life in 1978 as a contract manufacturer of sports braces that typically target sports-related injuries, and then in 1982 branched into the healthcare and rehabilitation equipment sector.

The company offers all kinds of equipment for post-surgical patients and those undergoing physiotherapy or rehabilitation, including abdominal belts, arm slings, orthopedic belts, brace dorso-lumbar corsets, cervical collars, clavicles, elastic waist belts, knee immobilizers, knee splints, post-operative knee splints, neoprene sacral belts, rib binders.

Being certified to ISO9001:2008 and ISO134585:2012 standards, the company uses quality functional materials to make all its products.

In 1994, the company created its own brand "SPECIAL" to start a plan to transform itself into a branded supplier from a contract manufacturer, which typically results in higher profit margins because a maker can charge for intellectual-property, added-value attached to a brand, rather than merely be paid for subcontract manufacturing.

The "SPECIAL" brand is promoted in Hong Kong, Indonesia, South Korea, Malaysia, Singapore, Sri Lanka, Thailand, Bahrain, Lebanon, Yemen, Australia, Mexico, Peru, Trinidad, the USA, Uruguay, Croatia, Germany, Greece, Italy, Macedonia, Poland, Romania, and the U.K. in to Taiwan through local dealers.

It has set up solid technical strength backed by precision manufacturing equipment, stringent quality inspection, scientific management, and well trained R&D specialists.

The company's other notable, marketable advantages include pre-shipment full inspection of every single product, rather than spot checking, and consolidated shipping in one container whenever practicable to minimize customers' cost as well as assure arrival of orders at the same time.

Placing strong emphasis on research and development, quality, service and innovation, the company has built a solid reputation for developing innovative products to meet customers' specific requirements.

Kuen Horng Co., Ltd.

IV sets, HDF connectors, filtering connectors, HME filters, components for blood line sets, needles, and hemodialysis connectors

.....

Since its founding in 1993, Kuen Horng Co., Ltd. has developed into a professional manufacturer of healthcare kits with consummate production capability.

The company's healthcare kits encompass dialysis blood recirculating line sets and IV (intravenous) priming tube components, including needle covers, affusion canisters, skidding sockets, vent needles, stabbers, needle bases, etc., as well as HME (heat and moisture exchanger) filters, bacteria filters, and artificial noses.

Kuen Horng's competitiveness is based on decades of expertise at plastic injection molding coupled with a seasoned knowledge of plastic mold development. These factors have enabled the company to expand the scope of its business from PC peripherals, handles, and plastic parts for luggage trolleys and bicycles into healthcare devices, and to swiftly gain a global presence in this new niche segment.

The company is noted for its sound production line, which consists of 22 plastic molding machines, as well as the 2.5D measuring instruments, universal templates, pullers, mold monitors, and other measuring tools in its clean room. Thanks to guidance by SGS, Kuen Horng won ISO13485 certification in 2011, helping to assure efficient, high precision production and consistent, unquestionable quality.

As it concentrates on continuous improvement and innovation, the company makes use of its know-how and R&D capability to offer the most reliable production processes and highest-quality products. It welcomes partnerships in the field of production, domestic sales, and exports worldwide.

Yow Song Injection Molding Co., Ltd.

Extruded silicone rubber products including strips, linings, sheets, tubes, hoses, pads, caps, plugs, keypads, and heat-extrusion-molded parts

Yow Song Injection Molding Co., Ltd., founded in 1987, is an experienced manufacturer and subcontractor of silicone rubber products especially for healthcare, food, and industrial applications. Its product line includes symmetrical and asymmetrical strips (cylindrical and solid), linings, sheets, tubes, hoses, electrical insulation caps, pads, keypads, flexible watertight plugs, and assorted heat-extrusion-molded parts.

Well equipped with the latest extruders and heat-extrusion molders, the company uses quality materials to turn out nontoxic, eco-friendly, and extreme-temperature-resistant products that are SGS-RoHS approved and sold under its own "Yow Song" brand, mainly to the domestic and other Asian markets.

Among Yow Song's wide range of products are hoses for healthcare instruments, drinking-water dispensers, and electronic apparatus; air-seal strips and gaskets for airtight jars and cosmetic bottles; strips for dish-dryer doors, dehumidifying storage, and machinery; and heat-extrusion-molded items including suction cups, keyboard keys, gaskets, iron rests, and shockproof and heat-insulated pads for electronic applications.

Kwang Yang Motor Co., Ltd.

Powered two-wheelers including motorcycles, scooters, mobility scooters; ATVs, utility vehicles, peripherals, accessories, and parts

Kwang Yang Motor Co., Ltd., known also as KYMCO Taiwan, designs and manufactures top-end powered vehicles which are sold under the KYMCO brand and delivered with integrated technical services.

Targeting the global market, the company's R&D team strives to meet the latest trends and demands with safe, convenient, efficient, entertaining, and highly functional products.

Initially a bicycle maker, Kwang Yang began diversifying into powered two-wheelers and other vehicles since 2001. Today the company turns out a comprehensive line of motorcycles, scooters, mobility scooters, ATVs, utility vehicles, peripherals, parts, and accessories on the OEM, ODM, and OBM basis.

For over 12 years Kwang Yang has been setting the standard for quality mobility scooters as well as ATVs, UXVs (utility vehicles), scooters, and motorcycles. In 2008 it set up KYMCO Healthcare UK Ltd. in South Wales to serve as its European mobility scooter headquarters.

In just five years, KYMCO Healthcare has become one of the U.K.'s leading makers of mobility scooters, and has built a solid reputation among customers for quality, reliability, stylishness, and high performance.

In addition to its High End (35mph/57kph), Luxury Maxi (10mph/15kph), and compact, car-transportable models, KYMCO is also proud to be able to make almost any kind of scooter to meet the varying needs of its customers. KYMCO welcomes OEM, ODM, and OBM orders.

Viroblock SA Debuts Revolutionary New Anti-viral Facemask

Viroblock SA, a Swiss manufacturer of medical facemask and personal protective equipment is proud to introduce a revolutionary new anti-viral mask. Viroblock uses cholesterol depletion technology that traps and kills on pass through air 99.9995% of H1N1, 99.999% of H5N1 and 99.997% of Coronavirus. Thanks to its special filtration design and patented technology Viroblock mask combines anti-viral properties with superb wearing comfort and excellent breathability.

Viroblock masks are fast acting against a broad spectrum of viruses. The mask is CE certified and is compliant with both European Medical Device Directive (EN14683) and European Personal Protective Equipment Directive (EN149). Aerobiology testing shows that Viroblock mask are 100 times better than ordinary respirator mask and 10,000 times better than regular surgical mask.

Viroblock's target is to introduce its unique anti-viral mask to EU, Taiwan and Asia supplying leading hospitals, healthcare clinics and dental practices. Governments and Health Authorities worldwide see Viroblock masks as ideal option for the stockpiling of medical supplies in anticipation of potential viral outbreaks.

For more information, visit www.viroblock.com and Viroblock booth No A1012 at Medicare Taiwan 2013 slated for June 20-23 at the Exhibition Hall 1, Taipei World Trade Center.

Underwriters Laboratories Taiwan Co., Ltd.

The Product Testing and Certification Leader

Since its incorporation into the UL family of companies in 1988, Underwriter Laboratories Taiwan Co. (UL Taiwan) has helped countless Taiwanese manufacturers from different sectors to better compete globally with a range of professional services from product testing and certification to global safety and performance standards.

UL Taiwan offers a wide scope of services, including product testing and certification (UL Product Safety), consulting and training (UL Enterprise Services), environmental friendliness and product sustainability (UL Environment & Informatics), life and healthcare (UL Life and Health Sciences), and supply chain and product verification (UL Verification Services). It also conducts Follow-Up Services, Conformity Assessment Services, Global Market Access Services, Energy Efficiency, Verification Testing and Inspection, and Lab Assessment.

Among UL Taiwan's most popular services is UL Product Safety, which covers a variety of products including insulating material and devices, IT equipment, batteries, cord sets, home appliances, switches, lighting and luminaries, fixed capacitors, fans, power tools, and others.

With around 630 experienced engineers on its payroll, UL Taiwan boasts a strong workforce and global resource network which ensure timely delivery of professional services with proven quality all around the island.

UL is an internationally trusted product safety testing and certification organization founded in 1894, and a global leader in product safety standards development, testing, and certification. For decades, UL has evaluated a countless number of products, components, materials, and systems for compliance with specific requirements. Its systems support governmental product safety regulations.

OSTAR Meditech Corp.

Cloud patient monitoring systems, medical monitoring systems, tele-care computing systems, personnel healthcare management systems

A pioneer in healthcare cloud-computing technology, OSTAR Meditech Corp. is committed to the development of user-friendly, green, and innovative healthcare products. The company has combined a concern for people together with medical engineering to create the world's first cloud patient monitoring system that precisely records the physiological data of patients so as to optimize healthcare services.

The company's multifunctional cloud patient monitoring system is a health information system (HIS) solution for hospitals and clinics, which is designed to measure and automatically upload the physiological data of patients, such as blood pressure, oxygen saturation, pulse, respiration, and body temperature, to designated databases at hospitals or clinics. This saves handwriting time, upgrades the quality of medical care, enhances work efficiency, and lowers flow-associated expenditures.

OSTAR is proud of its innovative blood pressure monitoring system, which clinical use has proven to be as precise as mercury sphygmomanometer and which is well-recognized by major hospitals in Taiwan.

The system is also expandable to include "remote healthcare" programs to allow patients to input and upload data collected at home to the medical record databases at hospitals or clinics for professional diagnosis and regular observation.

OSTAR has a vision for this system, and plans to work with telecommunications companies to develop a VIP-member service system that will keep patients and their families posted, via short messages and e-mails, on the patients' latest health conditions and will issue emergency warnings when abnormalities are detected.
