

# Yuan Hsing Industrial Corp.

CNC machining of remote-control model car engines, gears, and multi-spindle heads

**Y**uan Hsing Industrial Corp. was founded in 1998 by C.N. Gao, a veteran with over 10 years of experience in CNC machining, and was further expanded just last year.

Yuan Hsing today is a subcontractor that specializes in CNC-lathing and machining of gears and parts for automotive, mechanical, industrial, farm-machine, oil pump, and motor applications; mechanical parts and accessories; and multi-spindle heads and parts for drilling and tapping machines.

The company's multi-spindle heads, which are designed to enable mass production, are exported mainly to China.

After years of constant effort to upgrade its production technology and equipment, Yuan Hsing now also offers universal joints as well as tough-to-handle products such as engines and parts for remote-control model cars, airplanes, and boats.

As part of its commitment to the manufacture of top-grade products, the firm offers finishing services such as electroplating, including anodizing and hard anodizing, to enhance product glossiness and wear-resistance, as well as assembly services to order.

Yuan Hsing is currently engaged in the development of aluminum gears for a diverse range of applications. The company welcomes OEM and ODM orders for aluminum and nonmetallic parts for automobiles and bicycles.
