

Chung Tie Electricity Welding Machinery Co., Ltd.

Diversified welders and metallic electric fan guard turnkey equipment

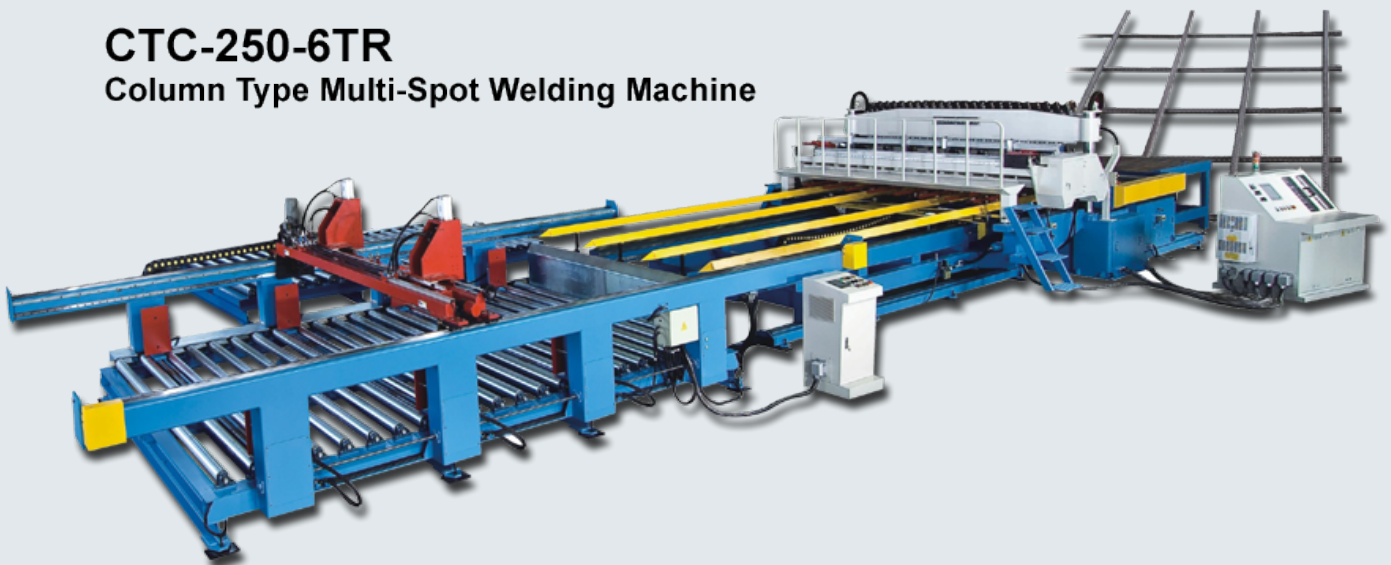

Founded in 1972, Chung Tie Electricity Welding Machinery Co., Ltd. is a leading supplier of turnkey plants for welding machinery and metallic electric fan guards.

The company, originally a ferrous wire welder supplier, has upgraded production efficiency of traditional, semiautomatic electric fan guard welding facilities, to have started to offer turnkey plants for fully-automatic electric fan guard in 1974. So the maker offers a variety of high-quality fan guards to meet global demand.

Apart from turnkey plants for fully-automatic electric fan guards, Chung Tie has continued to develop welders since 1985, supplying mainly welders, spot/multi-spot welders, seam/automatic pneumatic seam welders, butt/flash butt welders, metallic wire product processing machines, metallic grid/guard welders etc.

The core products include multi-spot welder, hydraulic multi-spot welders, automatic pneumatic seam welders and flash butt welders. Multi-spot welders are uniquely designed for welding construction steel, racks and flat steel. Hydraulic multi-spot welders are suitable for welding grid boards placed on roadsides, chemical plants and power plants. Automatic pneumatic seam welders are for welding ferrous sheets and ferrous motorcycle wheels. And flash butt welders typically weld ferrous sheets, tubing, ferrous and aluminum-alloy motorcycle wheels.

CTC-250-6TR Column Type Multi-Spot Welding Machine
