

Royce Enterprise Co., Ltd.

Furniture design and
manufacture

Founded in 1974, Royce Enterprise Co., Ltd. makes knockdown (KD) furniture of particle board and MDF, offering a wide range of home and office furniture to global customers.

After nearly four decades in the business, Royce is regarded as a globally leading maker of panel furniture. While operating an ISO 9001: 2008 certified plant in Batam, Indonesia, Royce currently has a total of 10 buildings, covering a total land area of 64,000 square meters, for production, warehousing and office operations, with over 700 skilled employees. The factory is also equipped with 16 plastic injection machines to produce the key fixture in-house. In order to keep upgrading service and product quality, Royce is constantly improving and adding new facilities to the production process, including wood working, plastic injection, and moldings, to streamline manufacturing processes and enhance the development of various commercial products for market demand. Currently, the company boosts its monthly production capacity up to 350 containers for one shift.

Backed by abundant resources in Indonesia and convenient wood supply from neighboring Southeast Asia, the company's production base in Batam is able to offer cost-effective furniture items to global markets, with added advantage of being close to Singapore, the world's busiest transshipment port.

To catch up with the world's eco-friendly trend, Royce also concentrates on sustainability of the environment and complies with the international forest regulations in the application of wood materials.
