

Sheng-Hsin Machine Industrial Co., Ltd.

Outboard motors and gears for boats, cars, motorbikes, and farm and industrial machines

Sheng-Hsin Machine Industrial Co. started out by making pinions and has prospered in the gear-making industry for over 40 years. Its product line today encompasses gears for farm machines and various types of other compact machines; outboard motors and parts; and cars, modified cars, ATVs, and marine vessels.

The company's impeccable expertise and strong R&D capabilities enable it to handle OEM subcontract processing of gears, shafts, and other items of any type and size, as well as repair and renovation projects by personal request. It also provides CNC lathing of gear-associated products. To better serve its customers, the company has invested some US\$1.337 million in the latest production equipment in recent years.

Sheng-Hsin exports 90% of products, mostly to North America, and counts major U.S. brands among its clients. The company is currently developing markets around the world.
