

Yu Long Metal Industrial Co., Ltd.

**Vehicular, motorcycle & bike parts,
multi-stage formed parts, and small hardware**

.....

Backed by 30-plus years' experience, Yu Long Metal Industrial Co., Ltd. is an experienced OEM, ODM in Changhua City, central Taiwan.

Adopting advanced technology and R&D, the company mainly provides motorcycle cable parts, automotive/bike parts, fasteners, spindles, small hardware, and multi-stage formed parts.

One of Yu Long's best sellers is the bike pedal spindle, which has extended hole of 110mm to guarantee higher practicality and excellent performance.

Stringently adopting SOP from product R&D, tooling design, forging, secondary processing, oil/filing removal, heat-treating, electroplating, QC to packaging and delivery, Yu Long achieves production efficiency to ensure high product quality and capacity, minimized labor cost, as well as prompt delivery.

To enhance product variety plus stable quality, the company has purchased a 6-die-6-mold forming machine, guaranteeing higher precision of customized products. And renewing in-house production facilities enables the company to keep long-term relationships with customers, building solid reputation globally.

The company is currently developing hand tool sockets and forged preforms of vehicular ball joints, also looking for OEM/ODM orders and joint ventures.
