

# Function Electric Inc.

*Auto, racing, forklift, marine switches etc*

With over 30 years of experience, Function Electric Inc. specializes in developing and manufacturing all kinds of high-quality, durable switches for automobiles (including performance-tuning switches), forklifts, watercrafts, heavy-duty and special-purpose vehicles.

The company's main products include engine, push-button, rocker, push/pull, headlamp, window, ignition starter, battery isolation, direction-signal light, toggle, emergency switches, and high-end switch control panels for automotive performance applications.

Known for developing and innovating newer and better switches, Function Electric offers over 500 models. With high quality, durability as well as reasonable prices, the switches are popular with global customers, who also praise the maker's service.

With a factory in Tainan, southern Taiwan, Function Electric steadily renews manufacturing and testing/inspection equipment to upgrade production efficiency and quality. And surging demand has driven the company to kick off construction of the second plant.

Function Electric claims to adopt only the best materials in production, turning out switches that are essential to effective operation of all kinds of vehicles and machines, as well as working closely with subcontractors who supply precision parts for final assembly by the company.

With abundant experience and know-how as well as strong in-house manufacturing, the maker says it is ready to offer custom-design, development and production services.

Quality System Registered to  
ISO 9001 : 2008
