

Oris Enterprise Co., Ltd.

Furniture design and manufacture

Established in 1992, Oris Enterprise Co. is a furniture manufacturer with a fully equipped 400-square-meter factory in Central Taiwan and a solid reputation based on stable quality and decades of experience.

The company employs advanced equipment which enables it to meet all kinds of customer requirements. Unlike some other manufactures, Oris Enterprise accepts small-volume orders and offers excellent ODM (original design manufacturing) and OEM (original equipment manufacturing) capability. It also welcomes the co-development of innovative products together with customers.

Oris turns out furniture materials such as honeycomb boards, hollow plates, and particle boards, and also supplies customers with small- and medium-sized products such as desks, L-shaped computer desks, book shelves, cubical bookcases with casters, TV cabinets, and knockdown furniture.

Their knockdown function, light weight, and substantial structure make Oris products popular with customers all over the world. In addition to exports, the company also keeps up its business in the Taiwan market.

One of Oris's popular products, a molding desk that features good quality and competitive pricing, is exported mainly to Japan. School desks and chairs target markets in the Middle East, and student's desks and cubical bookcases with casters are promoted in Central Africa, England, Denmark, France, and Belorussia.

To save on costs and remain competitive relative to other manufacturers, Oris carries out most of its production in-house, avoiding unnecessary outsourcing costs and maintaining excellent quality while providing customers with reliable and comprehensive services at all times.
