

Techpros International Co., Ltd.

Quality in-house production for all your OEM/ODM chair needs

Established in 1999, Techpros International Co., Ltd mainly supplies public seating in office furniture, restaurant furniture, bar chairs and tables, concert hall chairs, and chairs for use in schools, theaters, hospitals, and stadiums.

The firm can offer OEM/ODM products and its design team can develop the products to meet customers' requirements. Accordingly, the firm has established a good reputation for its superior R&D and in-house production abilities. In order to provide customers with lower costs, faster lead times and better quality control, the firm performs all bentwood, metal processing and sewing production at its three factories in Taiwan. The plants are installed with advanced and automatic machinery equipment including high frequency induction hardening for wooden products, CNC (computerized numerical control) wood processing machines, robot arm, high pressure molding, metal cutting, bent metal, timber, chipboard and plywood/solid wood machines.

It has relatively stronger competitiveness than other makers due to its full-package service that achieves cost and time savings, doing without outsourcing to maintain high quality, directly providing customers with reliable and comprehensive services at the best prices.

The firm has skilled R&D and designing teams that are capable of crafting ODM or OEM products, with such rich experience enabling the firm to offer customized designs to provide global clients public seating of high strength, comfort, and most importantly safety.

For instance, clients may choose a wide range of materials for seat covers, and have various designing options by different category of the seats. Besides, the firm's durable seats are made of bentwood coated with laminated melamine and phenolic resins. This high-pressure decorative laminated (HPDL) bentwood chairs with flame-water and abrasion-resistant resin coating. Meanwhile, its products feature SGS certificate for compliance with ANSI/BIFMA X5.1, showing our high security level.
