

Hokiffa Enterprise Co.

Dispenser faucet, water tap, faucets, plastic faucets, plastic taps

Before its founders set up Hokiffa Enterprise Co. in 2011, they had accumulated 35 years of experience in manufacturing and exporting drinking fountain faucets. Based on this vast store of know-how in production, and firm adherence to high sanitary standards, the company supplies a wide range of drinking fountain faucets, water containers with handles, water filters, and water dispensing solutions under its "Hokilla" brand. It also welcomes orders on an OEM/ODM (original equipment/design manufacturing) basis.

The firm's product line includes faucets, plastic faucets, plastic taps, water taps, plastic bottles, plastic containers, and plastic water faucets, all of which hold FDA (Food and Drug Administration) certification and are made of high-quality materials. With their ease of assembly and anti-leak design, these products are widely used with drinks, drinking water, cleaning solvent, oil products, and various other types of liquids.

Hokiffa has developed into a versatile manufacturer with robust innovation and manufacturing capability, along with the ability to adapt flexibly to market demands and to satisfy customized needs. The firm offers a comprehensive range of drinking-water solutions, from R&D to packaging, helping customers market their products efficiently.

Its firm commitment to the development of pioneering products has won Hokiffa a solid global reputation and a steady flow of orders. The company promises competitive prices, high quality, and sound after-sale services that benefit suppliers and customers alike.
