

TFU Industry Co., Ltd.

Plastic-injection processing services, plastic parts, accessories and products

TTFU Industry Co., Ltd., established in 1995, specializes in plastic-injection services, also having transformed in 2004 to offer integrated services, from product design, development, and mold fabrication to plastic injection.

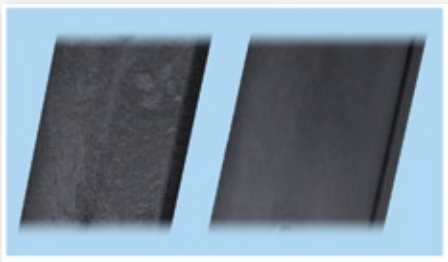

With state-of-the-art production equipment, coupled with ample technical know-how and experience, this supplier is fully capable of offering total solutions and high-end products.

With a modern 36,000 square-foot plant and 30 seasoned technicians, TFU is known for rapid service to customers from around the world, who come mostly from furniture, electronics, vehicles, electric machinery fields or request special specifications and products.

To upgrade product quality and production capacity, TFU has installed more than 10 sets of 400-ton plastics injection machines and other mold-making equipment, which enable the company to easily meet OEM/ODM

(original equipment/design manufacturer) demands.

A truly versatile supplier, TFU offers plastic bottles, parts, fixtures, sporting and leisure goods, containers, bicycle accessories, garment accessories, fittings and just about anything injection molded.

- Skilled in making smooth surface items to ease secondary processing
- Product quality exceeds that of rivals'
- Products delivered with superior, smooth finish
