

Ri Yue Xing Precision Industrial Co., Ltd.

Electronic components and connectors, hardware components, lathe parts

Founded in 1987 in the southern city of Kaohsiung, Ri Yue Xing Precision Industrial Co. strives constantly toward its goal of becoming one of Taiwan's most versatile manufacturers of CNC lathe components. The firm specializes in providing a comprehensive range of metal-processing services, hardware components, and electronic connectors for vehicles such as cars, motorcycles, scooters, and bicycles, as well as hydraulic and pneumatic fittings.

To ensure that its products meet the strict requirements of its customers, Ri Yue Xing has installed state-of-art equipment imported from Japan and Switzerland, including travelling-spindle CNC lathes, traveling tools, and CAM-type precision automatic lathes. This equipment is employed widely in processing iron, steel, stainless steel, copper, aluminum, and titanium, greatly enhancing production flexibility.

In addition, Ri Yue Xing consistently strengthens its quality control capability to make sure that every product meets customers' quality standards and special requirements. Backed by a dedicated set of QC instruments from the advanced industrial countries, the company turns out products that meet the highest of standards.

Ri Yue Xing's insistence on the constant upgrading of product quality, technology, and professionalism has been recognized—and appreciated—by customers all over the world. The firm has always done, and will continue doing, its best to provide the highest caliber products at the most competitive prices, along with the best of after-sale services.
