

Polystar Machinery Co., Ltd.

Plastic recycling machines, blown film machines

Established in 1988, Polystar Machinery Co. has grown into a globally competitive supplier of plastic recycling machines and blown film machines with more than 25 years of experience and a well-established reputation worldwide.

Aiming to become a market leader, the company takes advantage of its know-how to supply not just high-performance and high-quality machines, but also to offer all-around services from on-time spare parts delivery and online technical support to trouble-shooting consultancy, helping customers all around the world to build successful businesses.

Among the company's best sellers is the HNT-V plastic recycling series, a three-in-one recycling line that incorporates a crusher/grinder, extruder, and pelletizer, and can recycle bags, films, and LDPE, HDPE, LLDPE, PP, BOPP, and EPS flake waste. This high-efficiency line, which requires only one operator to handle, features effective mixing, stable extrusion, and high productivity. It is available with screw diameters ranging from 65mm to 150mm.

Drawing on its 25 years of experience as an OEM (original equipment manufacturing) supplier, the company moved up to original brand manufacturing (OBM) three years ago

with the launch of its own "Polystar" brand. It has forged partnerships with a number of large clients worldwide, and today is a high-profile supplier with solid footholds in more than 70 countries around the world.
