

Hsing Hua Electric Machinery Corp.

CDI systems, regulators,
electronics control units,
and ignition electronic units
for motorcycles, agricultural
machines, ATVs, and outboard
engines

Established in 1980, Hsing Hua Electric Machinery Corp. is a specialized maker of electronic, electrical, and electrical machinery parts and accessories for automobiles, motorcycle, all-terrain vehicles (ATVs), lawnmowers, agricultural machines, and outboard engines. The greater part of the products made by the ISO 9001-certified firm are produced on an original equipment/design manufacturing (OEM/ODM) basis for a select group of leading international brands.

With outstanding R&D capability, Hsing Hua self-develops and -manufactures a very wide range of products including ignition coils, starter motors, flywheels, stators, magnetic-type alternators, capacitor-discharge ignition (CDI) systems, electronic control units, remote devices, rectifiers, sirens, direction lights, flash relays, flashers/buzzer flashers, speed-limitation devices, and various kinds of special switches.

In recent years the company has been aggressively focusing on the development of high-level performance-tuning products, including starter motors, alternators, and CDI systems, and the supply of those products to big international brands.

Hsing Hua claims that its constant aim is to supply the best-quality, most-durable, and highest-cost/performance (C/P) value products to customers throughout the world, and to generate a win-win relationship with them. The company is confident in its ability to assure the very highest level of quality, the strongest of in-house R&D capability, and the finest of services. The firm welcomes you to contact it for more detailed information.
