

King Pin Enterprise Co., Ltd.

Plastic-injection tooling,
auto/motorcycle parts
(fuel-tank floats, rivets,
other small plastic-
injection parts)

King Pin Enterprise Co., Ltd. specializes in the in-house design, development, and manufacturing of molds for plastic-injection products. The company also supplies a wide range of plastic injected auto and motorcycle parts such as pull-starter housings, carburetors for agricultural machines, plastic carburetors for agricultural machines, fuel valves, fuel-tank floats, rivets, and a wide range of other small items.

The company says that it also offers automotive and motorcycle parts and accessories made of thermoplastic rubber (TPR), nylon (including special oil- and heat-resistant nylon), fiber-reinforced polymer (FRP), and plastic and rubber materials.

King Pin was founded in 1984 as an injection mold developer to serve vehicle-parts and -accessory manufacturers in Taiwan.

After accumulating expertise and know-how in related fields, the firm ventured into the production of various kinds of plastic injection-molded products in 1992. Its competitiveness, company officials comment, lies in the in-house mold development that enables it to save costs and shorten the period for mass production, its abundant expertise in plastic-injection manufacturing, and its integrated know-how in molds and finished products.

The versatile mold developer and parts maker is fully confident of its ability to meet customers' needs for products of different specifications and materials. Requests for more detailed information about King Pin and its products are welcome.
