

# *Ta Chen Technology Co., Ltd.*

## Conventional milling machines, bed type boring-milling machines, CNC machining centers

**B**acked by nearly three decades of production know-how, Ta Chen Technology Co., Ltd. has overcome numerous technological hurdles to develop a continuous stream of new products and today maintains a strong R&D team to meet the stringent requirements of its customers.

The firm offers a wide range of products, including conventional milling machines, bed type boring-milling machines, and CNC machining centers. Over the past 30 years it has steadily built up the size of its business and now cooperates with more than 300 satellite factories. To boost its market competitiveness, Ta Chen also operates a branch in Shanghai.

To secure high product quality and boost export sales, Ta Chen has worked hard on innovation and the cultivation of computer-aided-design (CAD) experts. It uses precision instruments and methods such as spindle testing, co-ordinate measuring machines (CMMs), high-precision inspection, and laser calibration inspection to boost productivity and stand out from its competitors. Thanks to its constant efforts, the company has won ISO-9002 certification for outstanding QC and ISO-14001 certification for excellent environmental protection performance.

In line with its customer-oriented policies, Ta Chen has established sales offices and maintenance centers in Taipei, Taoyuan, Taichung, Tainan, Kaohsiung, and mainland China. It also employs well-trained engineers to guarantee top-notch after-sales services for domestic and overseas customers.
