

Da Yao Precision Ltd.

Valve balls, electronic components, mechanical parts,
CNC machining parts, stainless steel parts

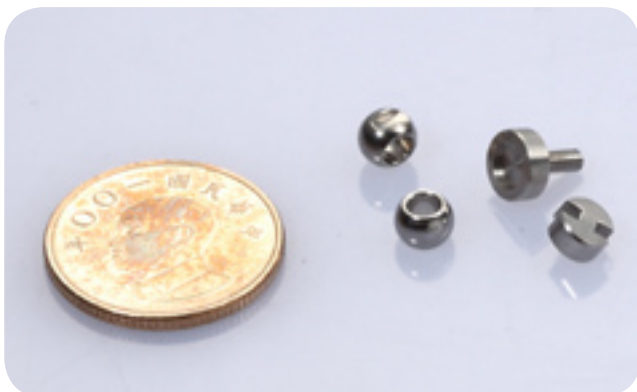

Da Yao Precision Ltd. is a veteran maker of various industrial parts, including valve balls, electronic components, mechanical parts, CNC machining parts, and stainless steel parts. The Taiwanese company has accumulated more than 37 years of experience in contract manufacturing.

After experiencing Taiwan's economic ups and downs in decades past, the company decided to expand its factory and introduce more advanced production machines in 2002 in a bid to further enhance its lathing capability and sharpen its competitive edge in an attempt to enter the global market. The strategy worked; Da Yao now ships its products to North America, Europe, and Japan, adding more power to its growth engine.

A seasoned manufacturing capability is Da Yao's core competency, enabling it to handle not just OEM (original equipment manufacturing) orders but also the ODM (original design manufacturing) business. The company is especially proud of its custom production coupled with exceptional quality-control capability, which helps customers precisely develop new products with high-quality parts designed and produced by Da Yao.

Always faithful to its motto of "Integrity, Enthusiasm, Quality, Innovation and Service," Da Yao makes the utmost effort to adapt itself to the ever-changing market in order to meet customers' varying requirements. It also works constantly to upgrade the quality and technology needed to make customers' products ever more competitive in the market.
