

# Yocoso GNDA Co., Ltd.

Forging and stamping parts for automotives, motorcycles, bikes, lawn mowers, machinery and tools

Since its founding in 1992 in Taiwan, Yocoso GNDA Co., Ltd. has been focused on forging and stamping to produce various metal parts for wide applications.

Yocoso's current product category encompasses a variety of forging and stamping parts for automotive transmission systems, bicycles, motorcycles, industrial production, lawn mowers, pneumatic tools, piping and plumbing, and so forth. Frequently awarded for its achievement and contribution to the industry in Taiwan, the company has been reputed as a trustworthy and competent manufacturer.

Over the years, the company has constantly improved its quality control measurements and technologies to sharpen its competitive edges in the line. The company started introducing the ISO 9001:2000 quality management system into its factory in 2004, and then was smoothly approved by ABS Quality Evaluations as a TS16949-certificated manufacturer.

In manufacturing parts, the company draws on its decades-long experience to consistently develop its cold, hot and warm forging techniques, and other sophisticated stamping technologies, in a bid to build a higher profile over its peers. The dedication has paid off, as the maker today is capable of independently handling integrated production from designing, developing and prototyping to manufacturing, and can also handle OEM (original equipment manufacturing) and ODM (original design manufacturing) orders.
