

Yi-Way Industry Co., Ltd.

Transmission gears for cars and trucks

Established in 2005, Yi-Way Industry Co., Ltd. specializes in manufacturing high-quality, precision transmission gears for cars and trucks.

The ISO 9001-approved maker supplies products that are popular amid global aftermarket customers, especially in the USA, Asia and Africa. Currently, the firm operates a factory in central Taiwan with advanced and integrated production lines, employing about 110 people with monthly capacity of 50,000 high-end gears. Meeting production, marketing and customer demands, the firm continuously imports precision manufacturing equipment and inspection instruments from Europe, the USA and Japan.

According to Yi-Way, its core competitiveness lies mainly in good quality, customer satisfaction, lead time between 60-90 days, and comprehensive range that leads the sector for such items for major light-duty trucks.

Yi-Way claims that it focuses on offering advanced technologies, quality products and sophisticated production to win customer loyalty and build mutually-profitable business, as well as developing top-grade products without defect, backed by all-round service.

The gear maker welcomes inquiries from global traders, importers, agents, distributors and auto parts manufacturers.
