

Hsiang Lun International Corp.

Gasoline and diesel engine gasket sets, cylinder head gaskets, rubber parts, oil seals, valve stem seals, etc.

Founded in 1969, Hsiang Lun International Corp. is a globally-reputable manufacturer specializing in the production of engine parts and components. For more than 45 years, the company has been devoted to research, development, design and production of engine sealing components. Hsiang Lun says that it has attained the capability to produce all types of sealing products for a full range of engine applications.

All of the quality maker's products are exported to customers worldwide under the company's own-brands HLIC and SanHo.

Since its establishment, Hsiang Lun has always insisted on the most rigorous management of production flow. The maker implements the most stringent quality control (QC) procedures beginning from tooling development, production, to final assembly. In conjunction with constant and intensive investments in product development, Hsiang Lun has become one of the world's most comprehensive suppliers of engine sealing products, supplying high-quality gasoline- and diesel-engine overhaul kits for most passenger cars, trucks and buses around the world, as well as boats, power generators, forklifts, agricultural and various types of industrial machines.

Also being eco-sensitive and ambitious to meet global product quality standard, Hsiang Lun says that every single process from production to customer service at the company is certified to international quality standards including ISO 9001, QS 9000, TS 16949, etc. As a conscientious member of the global business community, the maker plays its part in environmental protection. Since 2001, Hsiang Lun has exclusively used high-quality, non-asbestos materials to produce all its products, and the firm has been ISO 14001 certified.

By introducing the Enterprise Resource Planning (ERP) system, Hsiang Lun says, the company has become a true "one-stop supply center" providing prompt and on-time delivery. After taking an order from a customer, the company can complete the shipment process within 45 days. In addition, the maker also provides customized development, production and packaging services to help customers achieve the highest level of competitiveness.
