

Aimmet Industrial Co., Ltd.

HSDaimmet Waterproof connectors

AIMMET Industrial Co., Ltd., is founded in 1996 with strict ISO 9001, ISO/TS 16949 & ISO14001 quality and environment control system and makes various RF coaxial & FAKRA HSD Automotive connectors, making communication together.

There is a remarkable trend towards the development of wireless communication and digital content for Vehicle. Homogeneous impedance controlled interconnects system for high speed data (HSD) transmission applications is developed by AIMMET. This will be a high performance digital system for low voltage differential signals (LVDS) that prevents interference by crosstalk and external noise. The presented method is to bear two balanced pin pairs in one connector, and to let the characteristic impedance close to 100Ω. Moreover, the application fields of this connector in Vehicle are: USB connections, ETHERNET and LVDS cameras, etc.

Aimmet HSD waterproof connector sizes only 28.25*12.1*14 & 19*12.82 *14.05 mm. It's miniaturization designed to give customers more design space.

Aimmet – Meet your Aim.
