

# *Auspicious Electrical Engineering Co., Ltd.*

Electrical control components, pilot lamps, push-buttons, selector switches, micro switches

Established in 1979 and based in Taiwan's New Taipei City, Auspicious Electrical Engineering Co., Ltd. is a specialized manufacturer of electrical control components that are marketed under the "Auspicious" and "AP" brands. The company exports its products to more than 40 countries, and participates regularly in major international trade exhibitions in order to better serve its customers around the world.

Auspicious strives constantly to improve its products. It won ISO 9001:2008 certification in 2011, and most of its products carry CSA, TÜV, and UL approvals. The company's catalog includes mainly pilot lamps, push-button and selector switches (10mm, 16mm, 22mm, 25mm, and 30mm diameter), hoist push-buttons, pedal switches, screw clamp terminals (2.5~70mm<sup>2</sup>), terminal blocks (10A~400A), cam switches, power switches (16A, 20A, 32A, 63A, 100A), relay bases, panel meters, micro switches, limit switches, and tower lights.

The firm is committed to providing top-quality products and outstanding services. Known for its quality and reliability, it accepts OEM, ODM, and custom orders to meet specific customer needs.
