# Pro-One Precision Industrial Co., Ltd.

## Rubber and plastic Hydraulic & Pneumatic sealing components

Founded in 1996, Pro-One Precision Industrial Co., Ltd. is ISO 9000- and ISO 14000-approved maker dedicated to developing and manufacturing high-quality rubber and plastic sealing components, mainly including couplings for generators and pump seal kits, diaphragms for hammers, shock absorbers, gaskets, oil seals, repair kits, spare parts, o-rings, oil seals packing etc.

The company prioritizes designing and producing the best-quality parts for customers. Backed by a strong R&D team of more than 10 experienced engineers with expertise in rubber and plastic materials, Pro-One continues to rapidly upgrade and expand to become a major supplier in the international sealing-components industry.

Pro-One's products are adopted by global customers for a wide range of applications, including pumps and pipes, heavy duty construction machinery, medical, electronics, automotive, industrial and many others. The firm says its line of products meet requirements for hydraulic and pneumatic applications as well as special operating environments.

Fully confident of its laboratory, Pro-One claims to offer fully-guaranteed components that give buyers quality assurance, with satisfactory services that complement excellent value of product.

Pro-One promises to keep delivering quality products as a conscientious supplier, also assuring to offer price-competitive products that help customers improve and become more competitive.
