

Kevin Gears Enterprise Corp.

Mechanical parts, industrial-duty gears, agricultural machine gears, auto gears, yacht gears

Founded in 2001 as Lolewis Gears Enterprise Corp., Kevin Gears Enterprise Corp. is a specialized manufacturer and exporter of gears to Japan, the U.S., and Europe. The company expanded its operation, moved to its current address, and assumed its present name in 2006 with the aim of further expanding its markets worldwide.

The firm supplies gears for agricultural machines, automobiles, and yachts, including bevel gears, spur gears, worm gears, helical gears, gear racks, and worm shafts; gears for speed reducers; and gears for gearboxes, transmissions, and motors (0.3~M8). The company strictly controls its production processes and can offer products with quality rated from A_ to B by the Gleason system based on customers' requirements.

Kevin Gears constantly pursues the highest quality and the finest processing skills, and procures high-end machinery to produce the high-precision gears which are the key to success in the global market. Always putting its customers first, the company welcomes OEM and ODM orders.
