

Jenn Feng Electric Ind. Co., Ltd.

Automotive electronics including fuses, fuse blocks, fuse holders, micro fuses, terminals, circuit protectors

Founded in 1971 as an electrical fuse maker, Jenn Feng Electric Ind. Co., Ltd. has developed into a specialized OBM, OEM, and ODM supplier of electric and automotive fuses and accessories, with TS16949, QC080000, ISO 9001, and RoHS certification. The customer-oriented firm strives to expand its markets through product diversification.

In addition to its bread-and-butter fuses and fuse holders, Jenn Feng constantly invests in R&D to develop new and innovative products such as non-polarized LED modules, which have been patented in Taiwan, the U.S., Germany, Japan, China, and South Korea. The firm also offers made-to-order products, via technological cooperation, that meet the diverse demands of its customers.

Jenn Feng exports 70% of its output, mainly to Europe and the Americas. Annual revenues amount to around US\$12 million.

To comply with the market trend toward the miniaturization of electrical and automotive fuses, the firm constantly strives to strengthen its R&D skills so as to develop and improve micro fuses and afford them a higher dielectric strength.
