

E-Thing Industrial Co., Ltd.

Machine mounts, adjustable pads, anti-shock pads, precision parts, stampings, metal and plastic parts and accessories

A technology-driven manufacturer, E-Thing Industrial Co., Ltd. has developed various metal and plastic parts and accessories for various purposes.

E-Thing boasts decades of experience in contract manufacturing, as well as well-honed metal processing capabilities, particularly in deep drawing and hydro-forming of stainless steel and iron. Such core competency enables the seasoned maker to offer not only ODM (original design manufacturing) including product development and molding, but also product diversity.

The company offers wide-ranging products such as screws, washers, stainless steel & plastic legs and pads for furniture, stainless steel automatically adjustable mounts for medical instruments and machinery, stampings, builders' hardware & accessories, hydro-formed parts, laser-treated suction disks for glass tabletops, KD and office furniture parts and accessories, lighting fixtures, catch plates, angle finders, etc.

To adapt to ever-changing markets, the company has been consistently engaged in R&D, having developed numerous higher value-added products such as stainless steel anti-vibration machine mounts for industrial production and clean rooms, helping boost customers' competitiveness.

Prioritizing customer satisfaction, E-Thing focuses on efficient production, punctual delivery and all-around service. Backed by consummate production capability, the company welcomes partnerships on design, manufacturing and OEM (original equipment manufacturing).
