

Tsun Meng Co., Ltd.

Air tools, air screwdrivers, air torque screwdrivers

Founded in 1993, Tsun Meng Co., Ltd. has accumulated more than 20 years of experience in mechanical hardware and in more recent years has specialized in developing, manufacturing, and selling air tools. Its air screwdrivers are ideal for industries to use in making and assembling 3C parts, audio systems, toys, and other products.

Using CNC machining centers as its primary production equipment, Tsun Meng manufactures and processes air tools and hand tools for major brands. Other CNC automated machinery is used for parts processing.

In 2010, the firm succeeded in developing a pocket-size air torque screwdriver which is compact and lightweight, takes little effort, and does not damage threads; just press it to start, and it automatically stops when the proper torque is achieved. It is patented in Taiwan and China.

Working with its small automated processing plant, Tsun Meng continually cooperates with prominent companies and is known for honesty and constant improvement. In recent years, it has started developing its own brand of air torque screwdrivers, striving for perfection in design, production, and final testing.

Tsun Meng sells its products domestically and offers ODM services to clients in overseas markets, including China, Europe, and the U.S. The firm is looking for overseas retailers and agents, and welcomes all inquiries.
