

Jin Shan Die Casting Industrial Co., Ltd.

Aluminum and zinc-alloy die-castings as valves, electronics, automotive components and assemblies

Jin Shan Die Casting Industrial Co., Ltd. has been offering die-cast components nearly five decades in southern Taiwan, specializing in aluminum and zinc-alloy die-castings, including precision machined pneumatic, hydraulic, solenoid valves; electronic components; automotive parts and accessories.

Despite 50 years of success, the company continues to advance its production and quality inspection capabilities. It has procured a broad range of die-casting and precision CNC machining equipment, such as Mazak Horizontal Machining Center Nexus (HCN), ItalPresse TF-1850 cold-chamber die-casting machine etc., to fulfill different customers' demand. In addition, the company has been ISO 9001 certified by SGS since 2007.

All the company's personnel stick to the spirit of coordination, responsibility, flexibility and mobility, which greatly underlies Jin Shan's successful business. Though Jin Shan is not a large-sized company, all its personnel are able to fully interact and communicate efficiently with one another to get the work done on time. The company's motto "Professional, Integrity and Responsible" represents its solid commitment to its customers.

Jin Shan has kept upgrading its production equipment and techniques to offer better products and services at reasonable costs to satisfy customers' needs. By employing a variety of machines to handle the entire production, from processing of raw materials to precision machining and complete assembly, the company is confident of providing products and services of enhanced quality and value.
