

HCT Enterprise Co., Ltd.

CNC turned parts, high-precision turned parts

Established in 1991, HCT Enterprise Co., Ltd. is a world-caliber, ISO 9001:2008-certified specialist in CNC turned parts.

The company's CNC turned high-precision parts can be applied to a wide range of products, including fasteners, bicycles, automobiles, electronic devices, bathroom fittings, machinery, and IT devices, with 50% of which exported to the Middle East, Europe, Asia, Australia, New Zealand, and North America.

The company's global competitiveness is built on a consummate production capability and ample capacity, which are due partly to a comprehensive line of state-of-the-art production equipment and quality inspection, and partly to an extensive knowledge of CNC lathing and milling as well as the properties of metal materials.

The manufacturer is equipped with three traveling-tool CNC lathes, eighteen traveling-spindle CNC lathes, and 18 CAM-type precision lathes, which together can turn out various CNC turned parts with outer diameters from 2mm to 42mm and lengths of up to 300mm. All finished products undergo strict tests using a variety of in-house inspection equipment including high-resolution comparators, 2.5D comparators, precision micrometers, digital height gauges, pin gauges, and tread plug gauges.

HCT is able to apply a variety of materials in its production processes, such as brass, copper, aluminum, steel, stainless steel, and POM (Polyoxymethylene), depending on customers' needs. It can also draw on its own experience and know-how to help customers speed up their R&D processes with product analysis and professional consultancy in material selection, and can provide all-around services from manufacturing to surface treatment and assembly.

Committed to high quality and high precision, speedy delivery, and reasonable prices, HCT is confident in its ability to serve as a reliable production arm in the generation of mutual benefit with its customers.
