

Jiun Yih Workshop Co., Ltd.

Specialized in construction and building hardwares, bearings and rollers.
Stamping, Molding and Casting are available for customized inquiries.

Jiun Yih Workshop Co. has specialized in making bearings and metal parts for use in construction and industrial production ever since its founding in 1989.

Jiun Yih is noted for its commitment to quality, and for years has worked constantly to upgrade its production capability with the aim of achieving consistent, reliable quality. These efforts have paid off, earning our company a solid reputation among customers worldwide as a leading Taiwanese supplier of its kind.

Our product line comprehends garage door and truck door rollers and a variety of bearings, including miniature ball bearings, ball bearings, thrust ball bearings, pillow blocks, needle bearings, roller bearings, special bearings, tapered roller bearings, and water pump bearings, as well as related metal parts. The products are used in sports and fitness equipment, motorcycles, bicycles, cars, medical devices, hardware, roller shutters, woodworking tools, door and window rollers, and pneumatic and electrical production machinery.

Drawing on its seasoned know-how, Jiun Yih can help customers develop and produce injection ball bearings with custom specifications and special designs, injection molded plastic products, aluminum and zinc alloy die castings with nickel coating. Adding to our company's competitive advantage is the excellent OEM (original equipment manufacturing) and ODM (original design manufacturing) capabilities.

At present, Jiun Yih exports over 70% of its products all over the world, with the remainder going to local downstream manufacturers.
