

# ARGO Technology Co., Ltd.

Frequency control products, microwave wireless communication parts, oscillators, SAW filters, resonators, etc.

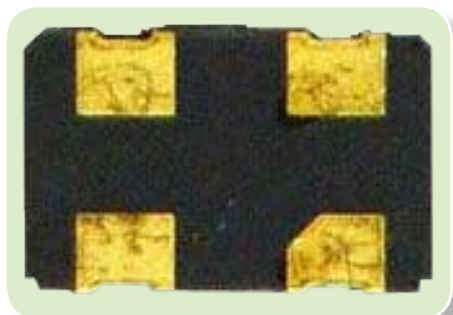

Founded in 1998, ARGO Technology Co., Ltd. specializes in developing, designing, and manufacturing band frequency controlling devices and microwave wireless communication parts. Over the years, the company has developed into a leading supplier of high-precision and -reliability products which are delivered to more than 1,000 customers all over the world.

ARGO is also a distributor of brand-name parts and components from Japan, Europe, and the U.S. It hopes to create a "no-boundaries" information age by cooperating with PC, information technology (IT), and wireless communications firms worldwide.

As a leading player in the frequency control device market, ARGO says that it never ceases in its efforts to develop newer and better products, and to achieve prompt delivery and the best possible service quality. The firm is confident in its ability to supply the most innovative products that meet the most stringent standards, as well as to provide the best in comprehensive technical support and total solutions.

ARGO's corporate ideals include "enthusiastic service and high reliability"; "top priority on prompt delivery and quality"; "respect for professionalism and technology upgrading"; and "enhancement of efficiency and customer satisfaction."

Its strong development and manufacturing capability enables ARGO to supply a very wide range of products, including SMD crystals, oscillators, filters, VCXO, TCXO, OCXO, VCTCXO, SAW filters, resonator chip varistors, GPS band pass filters, ceramic patch antennas, and ceramic gas tube arrestors, among others.
