

Auto Industrial Co., Ltd.

Automotive bearings, belt tensioner, hub bearing, clutch release bearing, idler pulley etc.

Auto Industrial Co., Ltd. specializes in developing and manufacturing quality automotive bearings for passenger cars and trucks, mainly offering belt tensioners, hub bearings, idler pulleys, clutch release bearings and clutch bearings.

Having strong technical capability in design, development and making high-grade products, the maker is a major supplier to many international Tier-1 parts companies. With strong design capability achieved by long-term know-how and experience, the firm offers products that are durable and reliable with improved structure and applied mechanics of materials.

Auto Industrial has a 20% to 30% share of Taiwan's domestic automotive aftermarket, and the firm kicked off more aggressive global marketing in recent years via its own "AUTOBEST" brand, also being a major supplier of related products to some major international automakers on the original equipment service (OES) basis.

The maker stresses to adopt top-grade bearings by international brands as NTN, SKF etc., also accepting orders with brand-specified core bearings.

With steady and intensive investment in product development, Auto Industrial supplies more than 1,000 products for almost all major European, Japanese, American passenger cars and trucks. It is also a comprehensive supplier backed by several dozen new items added every year.

Auto Industrial claims to have core advantage in efficient product development, achieved by its long-term expertise and in-house tooling capacity.

The maker operates a factory in northern Taiwan with annual capacity of 100,000 to 200,000 units of various products. (QL)
