

Chien Hsin Metal Industry Co., Ltd.

Threaded rebar couplers, friction-welding rebar couplers, hydraulic-grip rebar couplers, MTB rebar couplers

Founded in 1987, Chien Hsin Metal Industry Co., Ltd. has been dedicated to making rebar couplers and mechanical anchorage as a top-caliber supplier with proven capabilities.

Proving its capacity, the company took part in the construction of Taiwan's iconic buildings and projects, including the Taipei 101 skyscraper, nuclear power stations, Taiwan High Speed Railway, and mass rapid transit systems.

Consistent commitment to R&D and quality is the source of Chien Hsin's competitiveness. For years, the company has worked with Taiwan's major R&D institutes and universities on joint development of manufacturing technology and products, in addition to carrying out by-the-book quality control in-house. The efforts have been well rewarded, as this maker is ISO 9001:2008 certified, with its rebar couplers all tested for over 2,000,000 times in fatigue testing and accredited by CARES. Worth mentioning is that some of its rebar couplers are patented in Taiwan for improved structural strength.

The company turns out 1 million units of rebar couplers, including threaded rebar couplers, friction-welding rebar couplers, hydraulic gripping rebar couplers, and MBT rebar couplers, per month. It has built solid reputations not just at home but also in Europe and the Middle East with high-quality products and seasoned professionalism in engineering and trouble-shooting. The supplier also markets products under the BLC brand worldwide.

Huge project reference list:

- Taipei International Financial Center (101) (101 Floors Tower)
- Taiwan High Speed Rail Way
- Taipei MRT, Kaohsiung MRT
- No.1~No.4 Nuclear power plants (four plants)

Product: SA (Anti-Seismic) level. Highest level of Anti-seismic reinforcement Coupler

Supply Scope: Threading on rebar coupler, Hydraulic grip coupler, Friction welding coupler, P.C. bar coupler, Thread Rebar coupler, Mechanical anchorage
