

Jopofa Industrial Corp.

High-end stainless ball valves, carbon steel ball valves and related parts

Jopofa Industrial Corp., founded in 1990 by a group of skilled engineers, is today a high-caliber supplier of ball valves and related fittings and parts in Taiwan.

The company's product lines include one-piece, two-piece, and three-piece valves, as well as flanged valves, multiport valves, fire safe valves (certified to API 607 standard) and high pressure valves, mostly for chemical, mining, petrochemical, fertilizer, oil & gas, paper manufacture, food & beverage and biotechnology industries,

All the products, depending on purpose, have been certified by ISO, UL, CE, TUV, CAS, EMC and RoHS, in addition to API.

The company motivates itself with motto "Fashion", "Passion" and "Innovation". Its design team introduces an average of over 100 new products every year to cater to buyers pursuing diversified, less expensive valve products of good quality.

Over the past two decades, the company has won good reputations among international buyers for its strong commitment to fine quality, competitive prices, on-time delivery and considerate services. Also, the company is known as a competent, reliable subcontract supplier of valve products. It welcomes all kinds of OEM and ODM orders from overseas customers.
