

Shou Chi Industrial Co., Ltd.

OE FWD axles, assemblies and parts including half-shafts, outer & inner joints, steel retainers, tripod joints, center shafts, cages, races, ABS rings, CV boots, and grease

Shou Chi Industrial Co., Ltd., founded in 1975, specializes in manufacturing FWD constant velocity products, including CV axles, assemblies, and parts for world's major makes and models, sold under the "GCK" brand that is known for quality among customers globally. The front-wheel outer joints for Japanese and Korean makes and models are the company's forte.

The company focuses on making drive axles, half-shafts, outer joints, inner joints, steel retainers, tripod joints, center shafts, cages, races, ABS rings, CV boots, lock nuts, chromium balls, and grease. It also handles tooling, the processing of peripherals, inspection, testing, and assembly.

With a complete line of sophisticated production and QC equipment, Shou Chi works closely with organizations from advanced economies to deliver prototypes and production of FWD-related products. The

firm's TÜV SÜD ISO 9001 and TS 16949 certified production has enabled it to introduce OE quality products and be a certified supplier to OE carmakers in Taiwan, North America, and China since 1993.

GCK-branded products are made of hazard-free materials; eco-friendly, lighter than counterparts, optimized in design, and available in over 4,000 models, with hundreds of thousands in stock to quickly fill orders. The firm also welcomes orders for small-volume but large-variety production.

Shou Chi regularly develops new, innovative products to expand the scale of its business and service, having invested over US\$300 million in high-tech facilities so far. The company welcomes OEM orders and inquiries about its Taiwan-made top quality products.
