

Leap Tong Industrial Co., Ltd.

Magnetic healthcare products including magnetic plasters, wrap set, acupuncture bars, support belts, beads, and anion magnets

Founded in 1997 as a subsidiary of Magtech Magnetic Products Corp., Leap Tong Industrial Co., Ltd. is a specialized manufacturer of magnetic healthcare products. Initially patronized largely by customers of the parent company, the firm now has its own agents and wholesalers, and has built a sound reputation in the field.

Leap Tong places a strong emphasis on R&D and has developed magnetic plasters, wrap set, support belts, beads, acupuncture bars, and rotatable massage bars, some of which hold utility-model patents, and anion magnets, for which the firm has obtained 18-year patent right. All of the products employ SGS- and RoHS-approved magnets.

The firm's mainstream products are magnetic plasters and acupuncture bars, which are offered in various models at reasonable prices. Manufacturing and assembling all parts and products in its own factories in Taiwan, Leap Tong is known for its Taiwan-made quality and reliability. Ample flexibility in terms of lead-time and order volume helps bolster Leap Tong's reputation among its customers as an ideal supplier.

Having built a solid foothold in global markets, the company exports 80% of its output, mainly to the U.K., Singapore, Argentina, Indonesia, the U.S., Canada, and China. Among its customers are the prominent British brands Vitabiotics, Wasons, and Health tech. Offering OEM, ODM, and OBM services, Leap Tong is looking for agents to help it serve more overseas customers.
