

Kim Hong Machine Enterprise Co., Ltd.

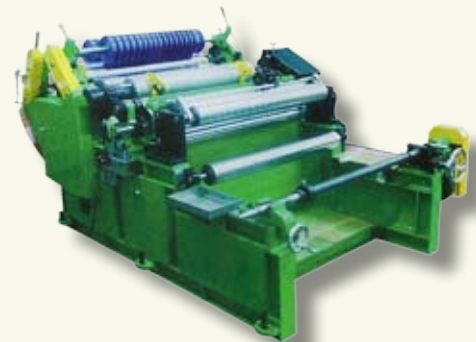

Paper, fabric, metal, rubber and plastic slitting & rewinding machines

Established in 2002 by seasoned engineers with more than 30 years of experience, Kim Hong Machine Enterprise Co., Ltd. designs, develops, and manufactures a complete range of slitting and rewinding machines for paper, fabric, metallic, rubber, and plastic applications.

Having exported some 80 machines to over 20 countries, the company has become known for offering efficient, high-quality, functional, and cost-effective products that are easy to use and maintain. Custom orders are also willingly accepted.

The company's slitting and rewinding machines are available in various models for use with paper (industrial, standard), non-woven fabric, label fabric, synthetic fabrics such as nylon and satin which need thermo-cutting and slitting, rubber and plastic (soft, rigid) film including PET, OPP, and PVC, lamination film, and metal film.

To serve its customers better and expand its markets in Europe, the U.S., Central and South Americas, and Asia, Kim Hong constantly develops innovative products with higher quality and better functions. Its latest offerings, introduced just this year, are the KH-ND and KH-HB slitting and rewinding machines. The company welcomes inquiries from dealers and agents worldwide.
