

Mars Precision Machinery Co., Ltd.

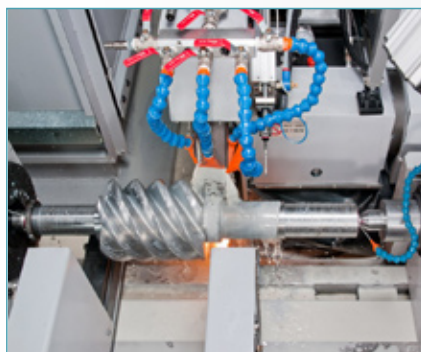

Cylindrical grinder, internal grinder, compound grinder, and vertical honing machine, etc.

MARS Precision Machinery Co., Ltd. is a professional grinding machine design and manufactory in Taiwan. MARS products include cylindrical grinding machine, internal grinding machine, compound grinding machine, vertical honing machine and tungsten carbide cutter machine.

All grinding machines have adopted MARS unique precision hydrostatic spindle and hydrostatic guideway. MARS products have won the “Taiwan Excellence” award, a well-recognized honor for the most revolutionary, innovative, high precision, high quality, high value-added products made in Taiwan. Taiwan Excellence is the highest accolade awarded to the MARS grinding machines.

Focusing on both local and overseas markets, MARS has a sound sales channel to market and distribute its line globally, having gained firm footholds in China, India, and Thailand. It also displayed its products at 2013 Taiwan Trade Fair in Beijing, India, Vietnam, and Indonesia.
