

Yu Kuang Electronics & Energy Co., Ltd.

High-power LED streetlights, indoor/outdoor LED luminaries, solar LED landscape lighting, and more

Yu Kuang Electronics & Energy Co., Ltd. makes a variety of LED lighting fixtures, including high-power streetlights, indoor/outdoor lights, solar-powered landscape lights, fishing lamps, water/explosion-proof lamps, navigation lamps, warning lights, and solar-powered recessed ground lights.

The company has over 20 years of experience in designing and manufacturing LED lights, especially high-power streetlights, fishing lights, water/explosion-proof lights, navigation lights, and warning lights, and has become a leading manufacturer in its field.

Using its quality manufacturing and design capability, the company has introduced a heatsink thermal module for its lighting fixtures that is patented in Taiwan, mainland China, the United States, Germany, and the United Kingdom.

The module is made of aluminum die-cast metal coated with a nanometer material that enables wind or rain to easily wash away the dust that would otherwise accumulate on its sleek surface. Also, the design allows raindrops, wind, and dewdrops to take heat away from the surface of the module, keeping the temperature of the lamp within 60 degrees C and thereby assuring the longevity of the high-power LED chips inside the lamps.

The company welcomes OEM and ODM orders from buyers throughout the world.

LED Luring Lights
