

ACME Electronic Machinery Co., Ltd.

Leather machine, leather measuring machine, wet blue leather measuring machine, leather spray coating machine, etc.

Founded in 1978, ACME Electronic Machinery Co., Ltd. specializes in designing, developing and making electronic leather measuring machine and leather spray system, which are popular in Europe, the U.S., and Africa. The company has secured major market shares in the Asia Pacific.

The maker is very proud of its strong R&D capability, offering several major product categories including electronic leather measuring machine in bench, elongate, and conveyer types, wet blue leather measuring machine, leather spray coating machine, etc.

ACME initially mainly offered maintenance and servicing for imported machines, then branched into self-developing machines with simplified circuitry, practical functions, and easy access to maintenance.

Based on experience from the development of electronic leather measuring machine, ACME sought unconventional design for automatic leather spray system using the same electronic control, and developed versatile and easy-to-operate, -maintain model--the ACME "Leather Spray Coating Machine", which is widely welcome by the leather industry, and then expanded into the spray paint market for artificial leather. After that, the company targeted improvement of its rotary-type spray system, enhancing convenience in mass production. So ACME offers a complete array of applications for spray painting on leather and artificial leather, providing solutions to one-stop purchasing.

Adhering to high performance, correct operation, low maintenance, ACME continues to seek innovation and engage in research to achieve the best quality. Meanwhile, the firm provides customized service, designing innovative models according to customers' requirements. It also offers consultancy and repair services.

ACME ELECTRONIC MACHINERY CO., LTD.

No. 40, Hwangong Rd., Yongkang Dist., Tainan City, Taiwan 710
