

Bai Cheng Tools Co., Ltd.

Ratchet wrenches, combination wrenches, socket wrenches, extension bars, ratchet handles, swivel socket wrenches

Established in 2007, Bai Cheng Tools Co., Ltd. has been making various wrenches and extension bars mostly for auto repair and maintenance as a competitive newcomer in the line.

Bai Cheng's product category encompasses ratchet wrenches, ratchet handles, socket wrenches, extension bars, combination wrenches, swivel socket wrenches, high-torque universal extension bars, and F-shaped, T-shaped and H-shaped wrenches, which feature excellent quality and are competitively priced, suitable for both DIY users and professionals.

To sustainably develop in the competitive landscape, the 7-year-old company draws on its solid know-how and consummate manufacturing techniques to consistently develop and improve wrenches to satisfy customers. Over the past years, this technique-oriented manufacturer has worked out a spate of impressive tools with higher quality and better functionality, or with multi-functional features, which can truly address end-users' needs.

In addition to paying strong attention to every manufacturing detail to ensure dimensional accuracy and reliable quality, the company also employs advanced quality inspection instruments, including a torque tester, in its QC lab, and willingly provides customers with test reports to help them bring products to market within the shortest possible time to achieve bigger sales gain.

The company is mostly engaged in OEM (original equipment manufacturing), and welcomes all kinds of partnerships all over the world.
