

Gowmiin Co., Ltd.

CNC precision lathed parts, lathed hardware, power tool parts, bicycle parts, auto parts etc.

Established in 1982, Gowmiin Co., Ltd. is a veteran company specializing in producing high-precision lathed parts. To pursue the best quality and precision to meet customers' various requirements, the firm adopts the most advanced and top-end computer numeric control (CNC) manufacturing/processing equipment and related testing/inspection instruments made in industrially advanced nations such as the United States, Japan etc..

Backed by strong manufacturing and processing capability achieved by its comprehensive range of top-end equipment, as well as accumulated experience and know-how in the industry, Gowmiin offers wide-ranging lathed products as hardware parts, power and air tool parts/accessories, motorcycle parts, bicycle parts, auto parts (transmission parts, gear motors etc.), gears, aluminum-alloy parts for paint-pellet guns, among others.

The ISO 9001-approved maker stresses to have full capability of solving different kinds of technical problems to fully meet customers' stringent requirements. In addition, Gowmiin also insists on supplying best-quality products backed by sincere, professional services to always achieve win-win status with global customers.

Currently, Gowmiin operates a modern and integrated factory in Taiwan, employing skilled and experienced technicians with deep know-how in CNC lathing work. Your samples and OEM/ODM orders are welcome!
