

Song Ying Energy Technology Co., Ltd.

Motorcycles, scooters, electric motorcycles, and electric scooters

Founded in 2010, Song Ying Energy Technology Co., Ltd. is a Taiwan-based motorbike designer and manufacturer with a priority emphasis on customer needs and R&D. The company turns out superb innovative products, delivers them with technical support, and steadily upgrades its technology for the development of new models with better eco-friendliness and higher stability, effectiveness, and efficiency.

The company supplies internal-combustion motorcycles and scooters made for safety, cost efficiency, and high functionality, while also focusing on the development and production of electric cars and e-bikes.

Song Ying utilizes low-pressure electronic fuel injection designed in-house to achieve eco-friendliness and cost efficiency. A kick starter is included for manual start-up in case of low battery, and an error sensor provides for immediate troubleshooting on the road. The firm's creed is that constant innovation is key to competitiveness and sustainability.

Song Ying's e-scooter models have obtained relevant certification in Taiwan. The firm provides integrated services to customers from design and development to production of the vehicles.

Currently, the company sells about 70% of its vehicles domestically and exports the rest to customers all over the world. It welcomes OEM/ODM projects.
