

Sin Seng Tay Co., Ltd.

CNC-machined couplers, gardening and bathroom hardware, air tools, and faucets

Sin Seng Tay Co., Ltd., set up in 2000 in central Taiwan's faucet-production hub of Lugang, Changhua County, focuses on processing and manufacturing 2~60mm tubing in brass, iron, aluminum, and plastic for firefighting, gardening, bathroom, and electronic applications.

In addition to supplying CNC-machined brass couplers, mist sprayers, spray guns, nozzles, faucets, air tools, and many more products, the company also handles color finishing and polishing for its customers. It also welcomes OEM and ODM orders.

With some two dozen CNC compound lathes in its 18,000-square-foot factory, where

both floor layout and quality control are in line with international standards, Sin Seng Tay is globally competitive in terms of price and quality.

Backed by a seasoned R&D team, the firm regularly develops new products with excellent

quality and functionality. One of the latest of these is a misting system used for both cooling and watering in gardens and farms, which is available in a full package containing all needed accessories and nozzles.

Dedicated to providing the best of quality and the speediest of delivery, Sin Seng Tay has built a solid reputation among customers for competitively priced products which, it says, are among the best available.

It sells globally, mainly to Japan, Europe, the U.S., and Australia, and is reputed for its time-tested know-how and outstanding R&D capability.
