

Elem Technology Co., Ltd.

Auto and motorcycle parts, optical and optoelectronic parts, precision parts processing

Since established in 1988, Elem Technology Co., Ltd. has been supplying precision parts and components on an OEM (original equipment manufacturing) basis for over 16 years.

The company is adept at precision processing, capably manufacturing and assembling optical instrument parts, bicycle parts, auto parts, motorcycle

parts, lens parts, camera parts and electronic parts. It is also a main contract supplier to such globally known enterprises as Taiwan's Asia Optical and Japan's Olympus.

In addition to well-honed production capability, Elem's current success is also attributable to the full line of state-of-the-art production equipment employed in-house, such as CNC machining centers, CNC turning machines, milling and grinding machines, which are systematically laid out and operated according to international standards to make sure dimensional precision and qualitative consistency are achieved.

Elem pays close attention to quality as well, carrying out international quality control measures throughout production process with advanced quality testing instrument, aiming to satisfy customers with zero-defect manufacturing. A further proof of the company's unwavering dedication to quality is the ISO-9001 certificate that it obtained many years ago.

Committed to R&D, zero-defect QC, reasonable prices, on-time delivery, and expertise, the company has built a higher profile than peers to be increasingly known by buyers worldwide over the past years.
