

Auto Cables Co., Ltd.

Car booster cables, electric wires, wire harnesses, battery clamps, lamp wire harness etc.

Founded in 1992, Auto Cables Co., Ltd. is a veteran company specializing in developing and making electric wires and cables mainly for automotive and motorcycle applications.

The firm mainly supplies car booster cables, electric wires, wire harnesses, battery clamps, lamp wire harness etc., claiming that its quality products have won global customers' highest regard for quality, durability, and reliability.

Auto Cables claims that its car booster cables are designed to be highly functional and safe, and are made with the company's top-end equipment and ample know-how and expertise. The company offers hundreds of color options for customers' orders for automotive wires; while all kinds of electric wires and cables can be custom-made. Auto Cables operates an integrated factory in southern Taiwan, with advanced equipment and stringent quality-control systems to assure the best product quality and durability for vehicular applications.
