

Vance Lock Industrial Co., Ltd.

Tumbler locks, tubular locks, disk locks, dimple locks,
cam locks, switch locks

Established in 1995, Vance Lock Industrial Co., Ltd. is a burgeoning supplier of locks in Taiwan, dedicated to developing and manufacturing higher-end, higher-security locks such as cam locks, tubular locks, tumbler locks, disc locks, dimple locks, switch locks, etc.

Additionally, this innovative maker also draws on its expertise in lock manufacturing coupled with extensive know-how of zinc alloy and aluminum alloy, as well as plastic injection molding techniques, to supply special locks with custom specifications and designs, as well as related parts and components. Offering reliable protection, the company's locks are well received by downstream clients from electronics, machinery and furniture industries.

For better sustainable development, Vance Lock is consistently devoted to customer satisfaction, which it believes can be achieved by offering the best quality.

To that end, the company activated a brand new plant spread over more than 1,100 square meters in Taiwan in 2008, in which quality control and floor layouts meet international standards. The manufacturer also hired professional enterprise consultants to spend considerable time training employees, to attain the best quality and the highest production efficiency.

Vance Lock's efforts have paid off, as the company was certified by ISO 9001:2008 (CNS12681) in mid-2009, emerging as a proven lock supplier with world-caliber manufacturing, R&D and QC capabilities. (SC)
